

## **455th Knowledge Seekers Workshop; October 20, 2022**

(Quick Index 28 pp Topic index, Transcription, Proofed, Need to do; Key Phrases, Words) (Auto transcription from Elias)

EU used to elevate soul of planet when no flights; Fields go around world; Make "child of soul" in systems; It's a technology - replication; Taking plants without soul; Iranian MaGravs tested and work; EU soon to be released to US - opening for KF T; 10 Nano coated mirrors - multilayered - absorb and radiate; Interaction with World Leaders explained - not by force - not a private line to their soul; Gans particle detectors; Ratio of Gans is magnitude; 5Plus1 Talks ongoing; 7 years - psychosomatic illness to materialize; Measure speed of M field; DNA changes - no Junk DNA; Every cell can change function; Nervous system like Nano materials; If Leaders enlighten - be kicked out; A lot of good Soul teachings in this one; Souls talk by changing color; Mr. Keshe 3 times in what should have been fatal accident; release of T delayed - not ready - accusations

### **Topic Index**

EU used to elevate soul of planet when not being used for flights; All can tap into the energy; Connected to man, plants, animals, stones; Seen massive changes in 24 hours; Monitor how souls tap into energy by color of Gans; Systems now can receive person and send back; Start to hear trees & animals talking to you; Observe how things start changing for you; Change - not by force- but understanding; Not waiting for Messiah - it's our own Soul - waiting for us to change; We are all connected - made from same material; Not "show me" - now if I can feel the fields of Linz - have reached maturity; It's understanding all the different work and interaction of the fields; Fields from Linz goes out side and around the world and back to system - elevating planet; It's 3-D - effects felt in all directions; Just needs a "flash" to fall in love; "the fields are so deep"; Found perfect couple to make "child of soul" in systems; Test next generation man will make in Space; It's a technology because it can be replicated; Body of spaceship already built in China - will be sent around world - these systems will fill it; New understanding of psychosomatic - balances itself; Didn't work for those who blocked it; Nevertheless weeks later they changed; Pull under table like Iranian girls - Soul; Once go in system - receive fields of U; Taking plants from Africa like slaves to Europe - don't take the soul; Same with birds; Will we bring people of U back to Earth put in fields like Zoo; Iranian MaGravs tested for 10 months work - huge savings; Why when KF makes it - the T works - it's understanding the process of the fields; Try to connect to Linz Center - spread fields across planet; People who don't feel anything in Linz - want to be in control; Will come to an agreement with American government soon- release T; EU to Uruguay, China, Germany; Question about if Iran is using plasma T in Ukraine: Open T as fast as possible; America - opening for KF what is to come; We all have to be ready to accept the T and consequences of it; Love of the Creator is freely spreading across the planet - It's there if you are ready to receive it; 10 Nano coated mirrors released - good for Mobile and Satellite transmutation; Nano Mirrors are multilayered special field interactions - like black hole - but absorb and radiate; Stand in-between act like Gans Box;

Interaction with World Leaders explained - not by force - not a private line to their soul - concentrate fields through AA connection - effect how they perceive what they are doing; Through your emotion and intention - opens a channel to someone not magic - nor a special access to someone; If war has field strength so does peace - create conditions for peace;

Best ratio of Gans is what it takes to move an object you want to move; With Gans's it's an order of magnitude not a direct ratio; Don't know how many Gans particle in a drop - can be thousands of times different; Need to develop Gans particle detector - next step; Current meters only in matter state; Use Gans water - amalgamation of fields; 5plus1 talks updated - do not know if Iran using plasma T in Ukraine - talks constantly changing; Danger of nuclear accident; U Community is already here interacting and sharing knowledge with humanity; Extending lifespan to thousands of years; Space gap size brain allows Soul to grow into to reach maturity - can measure time of separation of STM from physicality; 7 years for psychosomatic illness to materialize; Have to be useful when extend life - not retire 65 without anything to do; If short lifespan can move Soul to another place live millions of years like Sun; Future will measure size of STM - then amount filled tells how much life left; No one in U managed to understand all of it; As a Creator - we have whole of knowledge - can access other parts of U like an App - understand that part; "I am the Messiah" - means Messiah of his own Soul and nobody else's; Create new tools to measure speed of M field; Would strength of different Souls fit together?; Color of Soul; Travelers of U bring us more knowledge - go to other parts of U to learn; DNA changes - most probably - it's a M field; No "Junk DNA" - everything has a purpose - created by fields of U; Cells are multi-functional - can change position and strength - same cell can create different positioning, reactions, and emotions in the body of the man; Nervous system works like Nano materials - super resistor outside - inside no friction high speed communication; Belgium's labeled terrorist because made it without radiation; Even if world leaders enlighten - trapped by own organization that feeds them - will be kicked out; WL crawl on floor to feet of Pope - what things they did to get power; King Charles generation gap; Messengers are no different than humans - only more knowledge; Humbleness; Knowledge Mr. Keshe carries - and detached; Not hide in structure like Vatican; Walked away from king's life to spread T like what we have today; Sees physicality and feels the Soul; Philosophy and theology arose when we had no knowledge of the existence - now no need for them; Some people in Center - say to themselves "I exist - I am"; Can change your own Soul in a second; Have special system can tell who comes to give and who to take; Can extract certain fields from system; All types of people come to systems; How do plants change in Linz Center; Physical transmutation part of system shut off during time of elevating the planet - no souls can show up in system; Souls communicate by changing to different colors; Visiting Souls can leave earth anytime; Mr. Keshe went through 3 devastating accidents that should have ended his life - but each time walked away unscratched - in details; He stood outside watched accident; Destiny to fulfill; Security camera footage on Internet of unbelievable occurrences; Long discussion about why technology is delayed in coming out - humanity not ready - KF is growing more, better position; Accused of stealing and wrong doing - but everything is in writing; Change is coming; Souls protecting KF; We are all in it together; Satellites are with us - they are receiving fields

from Linz; Start Satellite after new systems come in; We have a lot of silent KS who do a lot of work in the background; Pain during mediation - depends how you interpret it - could be from other dimensions - again how you interpret it and knowledge you have; Different plasmas together already pressurize each other - depends what you want to do; Does speaking about negativity make it happen - or help to resolve it - depends how you think about it;

## **Introduction to 455 KSW - It's Us Who Has to Change**

Last week Mr. Keshe sent a pulse of love around the planet that lifted him off the floor. Now this week the Enhance Unit will be used for the purpose of elevating the soul of the planet, when it is not being used for flight tests and transmutation. The fields will go out one side, around the planet and come back in on the other side. Keep in mind the fields are 3 dimensional and also have the "freedom of path" to go where they are needed. With this new development it is up to us to open and receive the fields. It was said that the Satellite Souls already have this connection. This is how the change is being brought right under our noses. Don't wait for the Messiah, you are the Messiah of your own Soul. It's opening and receiving and sharing the energy. It's for us now to continually try to feel the fields of the systems in Linz, and the soul of peace spreading around the planet.

A very interesting question was raised on whether the world leaders were enlightened. It was said that, some of them know the truth, but they can't do anything about it, because the system that they are a part of, that supported and brought them to where they are, will not allow it. They will be kicked out. Now we understand why there will be no "Second Coming of Christ," as Dostoevsky wrote, they would put him in jail or execute him.

How does this relate to us.. and the changes we are about to go through? It may be very shocking to a lot of us to think that the same thing applies to us. Haven't we all experienced that, when the light of the Soul suddenly turns on, and we look around and see that the "tribe" we belong to, or religion, has very narrow minded and limiting views. That feeling when our emotions and thoughts no longer match to our family and friends. This is a moment of awakening, if we go with it, if we don't cover it up and deny it. This is the moment you need to have contact with your Soul, or what we call, "a spiritual practice" - that is real and living and makes the Soul alive in us. Otherwise, we run back to the herd, and pretend we never saw the horizon of the Universal Light shining in us. To me, this is the change that is to come. It's not outside ourselves. But now we have the tools of the plasma science to connect to the Universal Energy and become that Satellite Soul. There is no fear in it. We become that shining light that feels so much joy in serving the others. On this note Mr. Keshe made the following statement.

"Enlightenment comes out of the time, position and the strength"

It seems that we are working on the position and the strength, by building up the field strength across the planet. The right time will arise out of our process, but the enlightenment itself will be instantaneous. But still, we have to recognize it and bring it into our lives as something real to us.

Mr. Keshe stressed that it is important for us to understand what we are doing. We are not changing the world leaders to fit into what we want. It reminds me of Mahatma Gandhi, when he tried to teach his followers that he loved the British, and that they should not use the tool of "non-violence" as a weapon against them to get what they wanted. When we focus the fields to elevate the Souls of the world leaders, we are not directly accessing them and changing them. We are creating a condition where the field strength of peace is becoming stronger. It effects them in the way they perceive themselves and what they are doing.

Remember, for a simple person like you and I, it would be almost impossible to meet one of these leaders. They are protected against other ideas. Now with the tool of this technology, we can access them by the Soul. Because we are made out of the same material we can connect to them. We can ask them, "what are you doing, why are you killing us and enslaving us." We never thought that this was even a possibility. Think of all the Catholics praying for peace, while denying their leader is starting the wars in the background. It has no power of truth to it. Now we know, and through the technology, which we can repeat, we have discovered the immense power we have within us to make this change happen. This is also why we have to participate and build up the field strength.

The systems are turned on in Linz. It's only for us to tap into it and bring the change.

There was a big discussion about why there is a delay in the release of the technology. Is it mainly because humanity is not ready for it? Or do we have more things to learn before we reach that point? He said, that had the technology come out 10 months ago when it was planned, we probably would not be where we are today in our understanding. There is a lot of truth in this. Just think back to June 6th, and what our level of knowledge was at that time, and what it is today. Just by pondering it a little, there is such a huge difference in our understanding. Now we know we have a STM, STP, and Physicality and a couple weeks ago a KS saw them coming out of herself as a light. The beauty of it is, by her sharing we all got to experience it. So now we know, what we didn't know before, and it changes our "reality."

It's always nice to hear personal stories of Mr. Keshe. He had been in 3 fatal accidents in his life, that he should not have walked away from, but he did. He tells of coming out of his body and watching the accident take place. Several times in this workshop he alluded to himself, as "watching" the process of this massive change, that is going to hit humanity. It's coming, and he knows what is happening, he is watching, and he is telling us what is happening.

Let me point out some important topics to think about in this workshop. Do you remember in our Daily Intention, months ago we focused on the Iranian factory to succeed in making the new MaGrav. Well they succeeded, massive savings over 10 months. The MaGrav we couldn't get to work, KF achieved it. It's not known for sure if Iran is using plasma technology in Ukraine, but this is against the agreement. There will

be an agreement with US government to release the T to Arizona. The body of the spaceship units already built in China should start being shipped around the world. The internal systems will come from Austria. The next step in T is to create detectors for speed of M fields, measuring Gans', and the size of the Soul. The brain creates a space for the Soul to fill into, when it's full the Soul is mature - to separate from P. DNA is a M field and it changes. The cells are multi-functional they can create different reactions, positions, and emotions - basically they are alive. No Junk DNA - everything has a purpose in the fields of the U. The more knowledge you have - should become more humble. Nervous system works like Nano material. Souls communicate by color - in a party with Souls they are constantly changing colors.

As usual such a beautiful workshop. I hope you enjoy it for many days of study.

Thank you for listening.

## Quick Index

The reason for choosing the Intro video is because KF is entering a new phase of space flight. There were no flight tests this week, but there were other things happening. (We have decided to use the off time of when the flight systems (FS) are not being used to use them for elevating the planet. Through the EU we'll start giving the energy lacking from the planet to the inhabitants. This means we'll try to bring a connection between all sections of life on this planet from the animal kingdom, Man, the solid state and everything that goes with it. We'll give to the soul of the planet).

From now on during the time when the system is not being used for flights, we use it for the elevation of the soul of the planet. We are responsible for every living thing on this planet. Through their M field, every one of them positions themselves in a given position. A tree, stone, man, and an animal has a position, and we move between them. Some of us have decided as a soul construction to stay put and not move. Others have decided to move around, even shaking in the air like the leaves of a tree. But in essence, we know we are all souls.

We have set it up that we can interact with every soul on this planet and beyond. During the transmutation from one system to the other, we'll set it up that the fields are available for every soul to elevate itself. Every living soul can tap into the energy if needed.

(We have connected our system with the blood of Man, another protein of the animals, the essence of the Soul of the Man (STM) - the material which created us. And we have (used) the soul of the elements of this planet and the elements of the life of the Vertical People. We are rapidly expanding the system).

We've seen massive changes in the past 24 hours. (We've seen changes in the school of thoughts). The changes will come. I asked you last week, if you felt anything at 7:30 AM, 2 hours before the teachings. I released a field, in whatever shape. Now it's not me

anymore. It's a system, which is like a beacon and shares its fields with all of you. Any of you who tap into the Linz Center, can come to that point. Maybe you can interact with it. Maybe you've been there. Maybe through you, others can interact with it, and receive the fields, if your Soul is ready. It's different than when you rush towards something and say, "yes," I want to be (part of that). But then your Soul says, "oh boy, you're not ready yet. Wait, hang on. I have the telephone number but I'm not dialing it yet. You have not reached that point of (maturity yet)."

From now on, whenever we leave the system in the running position, we'll allow the level on the Soul, and the Soul of the Physicality (STP) to operate. We will switch off the physical interactions side. In this process, we have brought a new dimension. When we go back to the system next Tuesday, we will see how it is. We'll see how much we have to top up the (energies of the) system, because so much of it is (being) used. The system itself receives as much as it gives.

We would like to see if the Gans's inside the system have changed colors, and if they have moved, how much and how they sit. Then we'll (be able to tell how much) you as Knowledge Seekers (KS) have tapped into the system, as well as other souls without knowing it. (As the system is at the strength of the elevation of the Soul, we'll see what has been received from it).

In a way, you don't need to pray to elevate anymore, where in fact, you are being continuously elevated. This is vital for us. This is important for us to ascertain how we as Knowledge Seekers bring the change in, and are a part of it.

Those of you who are the Satellites should (be able to) feel the change. Those of you who registered yourselves to be Satellites (should feel the differences that are happening). We don't tell you in advance, (because we don't want you to have perceived ideas about it, that it would condition your response to it).

We have started setting the system up to receive the first transmuted person into Linz. There are some criteria, and we needed some materials, which we have received. It's getting set up. We have informed the person that we'll start the process now. It will be like before when we started the first process with the Enhancement Units (EU). Now we'll start the process with the transmutation.

Our system is now able to receive (a person) and to send them back. We have shut down the system that can only receive. That way there won't be any confusion, and we won't receive two halves (of a person). First we have to see what emotion arrives with the Soul. To see how we feel with the arrival of the Soul. Then we have to decide who will be in the system to receive the Soul. It's not just "beam me up Scotty." (We have to do different tests to get it right). We have to know if the person in the system feels the emotion of the arrival. And other things as well.

This is the moment many of you have been waiting for. We saw this the couple when one felt the other partner on her lap. In this part, we want to feel if we receive the person in

the secondary chair in the back, or (in the front on the lap of the person waiting for them to arrive).

(The exciting time of bringing the transmutation into a functioning order has started. It'll be interesting to see how you as Knowledge Seekers see things happening, now that we have the system running. Will you see other souls? If you do, do not consider yourself crazy, but rather consider yourself as being ready to be educated in the world of the Creation).

(Don't be surprised if you experience the trees talking to you, or the stones dancing, or the dog starts telling you he is hungry. Because now you feel his soul, and you can interact with it, and you can watch how it interacts with you. It's like when a beautiful child is being carried in a baby carriage on the street and people turn their heads to see it, and to talk to it, and to praise its beauty. Now you are that child on the street, and all the beings around start interacting with you. They look at you, as much as you look at them).

Try to understand the interactions of the fields. And only look for verbal communication when you are dealing with Man. Understand the emotion of the language, and the emotion of the interaction of the fields. This is very important for us, as we are preparing the second system to (be the Satellite system, to setup the next phase of transmutation).

(We want to see how things improve for you, or if suddenly your life changes direction, and you don't want to do the things you did before. Material things don't mean the same to you what they did before. Or maybe a position you were not considering before, now has become a consideration). (We want you to observe and understand what is happening in your life since we turned the systems on to elevate the planet).

We are not here to bring the change by force, (but rather through understanding, so that you change yourself. Now you don't have to wait to leave the physicality to change. In fact, right now while you're all listening to these teachings or thinking, you are actually receiving the fields from the Enhancement Center flight room in Linz).

(We want you to understand what we are doing. The planet has been short in giving us the energy we need, and now we are getting that energy in a different way. See if you're eating habits change, or if you're breathing habits change, or if your school of thoughts, or your way of doing things changes suddenly and you don't know why).

We will continue this process for months to come. When the system is free and not being used for flights, then we'll continuously use it to elevate the "interaction of the fields on this planet." (It will also interact with those of you who live in this area of Linz, and those who have made a connection by being here in the Center, or by meeting somebody who has been here, or other ways of being in touch with the system).

We have set it up to bring the emotion of peace, and to bring the soul of peace, (and that with it, we all understand the change has come). This is part of Foundation's work. The

Foundation's work is not just all the time making Nano coatings, Gans's, and systems to see how the fields interact.

(Through these you have learned the alphabet of the technology. Now it's time to start making sentences. It's time to start make letters of peace using this technology, by adding the bits and pieces of knowledge together, to make words and sentences).

While you were listening to the Intro video, I was telling the officials that we need to use the technology as tools of peace. (We need to see the technology working and to be part of the process of understanding it, So that the knowledge will be used in the correct way).

(We are not waiting for the changes to happen to us. We are waiting for us, ourselves to change. We are not waiting for the Messiah to come, because we know that the Messiah is us, for our Soul. We have to be the one who decides the time and place. We don't need to die to become a Messiah. We can become a Messiah as part of our life, as part of the living, and part of the work we do).

A lot of you are looking for a physical interaction, (as the confirmation of the change, and whatever else happens is just a dream to you). But you have to understand, that from now on, what you call the dream, has been part of you, but you ignored it, because you never understood it.

There are no more coincidences, and no more, "it just happened to be." We are here to make it happen, because the technology and the systems are set to go. When we spread these systems across this planet, the way you have done with Gans's, we'll connect with all of you. Now we set the signs and the scene. Every jar of Gans you have in your house is made from materials of this planet, and we are made from the same materials. Therefore, we have already made the connections. It's up to you how you receive it, in which direction you'll receive it and what you give to it.

Try to understand that the Keshe Foundation is made up of you, and the way you are, and nothing else. It's is not a religious organization, nor a cult, nor anything else. It's the Totality of the work, in how we understand the world of Creation in the matter state, and in the energy fields. How energy becomes matter, and matter become energy. Then we'll take it to the next step, and understanding of the next step. Then we'll come to understand what we need to do ourselves. It doesn't need to be only physical, what we call, "show me something." Now it's "feel" me something. Because in that feeling, I can't ignore, deny, or hide them. (Because somewhere inside me I know that if I accept it, then it means I have reached the point of the maturity).

We brought you the technology in such a way that it does not stay a mystery, nor become a magic show. We built the systems and then we brought in to be a part of the process of understanding, so that it doesn't become a the magic work. The way we set the system up, is that, as we are speaking now, it is running and it's bringing the change. It brings that position and condition of change for all of us.

(If we understand this, then we'll come to understand more and more about the work of the plasma. The plasma works by interaction of the fields, collaboration of the fields, amalgamation of the fields, division of the fields, cooperation of the fields, and clusters or combinations of the fields. (But you have to understand how the fields work in Totality, where they come from, how they will change, what effect each one of them has on other fields adjacent to them, or through interactions, or through amalgamations, and what effects they create and bring about).

(We've seen many of these conditions, but we never understood them. Like when we stand between the two Gans pictures and feel the fields. What does it create in us emotionally, and physically. Sometimes we may feel it in our muscle tissues, or sometimes we may feel happy just to be in the fields. And sometimes we don't want to be in those fields. Now if a painting with a static color can effect you that way emotionally, then can you imagine how the dynamic systems which are running in the universe, and the fields from the Linz Center will effect you).

(Like when you stand between the two pictures and try to feel the field interactions between them, we have the two systems 4 meters apart. But this time don't look for the interactions in-between them in that 4 meter space. Look at the interactions of the fields going out the other side of the system, and then going around the planet and coming to the other side of the other system).

(Remember it's a three dimensional system, so its effects are felt in all directions. It's how we interact with it. The system does not choose the path. The fields of the universe decide the "freedom of the path," and which (areas) to cover. Does one of these "freedoms of the path," come to your soul, that you get elevated in a flash of light). In that flash of light you understand something.

As one of the KS said when he was in the system, "for an instant I smelled the coffee." That's all it needs, is a flash, which makes you to fall in love in an instant. It's not something which grows for years. Observe how you change and what you do in the coming weeks. Observe how you start looking at things in a different way, than how you were looking at them before yesterday.

We put the system into operation around 11 to 12 o'clock yesterday. Think back, did you feel anything? Did you wake up with a different emotional feeling? I did. (I felt) the fields are so deep. I wrote to one of the KS and he wrote back saying, it's so deep, it's so profound, that it's like opening the eye, opening a new dimension, opening to look at the things in a different way, to be.

It's important for us to understand and to be able to develop this knowledge, not for ourselves, but for the others. One of our KS who is on the line with us now, knows exactly what I'm talking about. (If the opportunity comes, we have chosen to create the first child through the embodiment of the two systems. I think we have found the perfect partners. (Where there is no possibility for them to become pregnant by accident or something else). We are so confident in this, that we can take the step forward to the

creation of the perfect Souls. (Today people have "test babies," where they choose the color of the skin and the eyes, whatever). Now, we allow the Soul to develop that perfect soul for a child to be born in the dimension of the Soul, and then it is embedded within the womb of the mother.

The technology is so advanced, that this is not a dream anymore. It's the reality, which we can deliver. It was a pleasure to come to this conclusion. I think we have chosen the right couple for this work. If they decide to accept it will happen in the coming weeks and months. This brings a new dimension to the work and to the life of the man in space. We are not here to create a child for you to see. We want to see how, when Man falls in love while in the space, and creates the next generation, how will he handle it. (Later, he'll bring that Soul to Earth to show him his mother land, and where he came from).

Bringing a body through the atmospheric condition has a lot of hazards. But bringing a soul in the dimension of the fields and then transforming it into the physical dimension of the man on Earth is totally different. You'll understand why we are doing this. We are setting up the dimensions and directions for the future tests, and development of the generations to come that will live in the space. It's not just something we do for the fun of it. We do this to be able to understand and perceive what is to come.

(The changes that come will be because we have understood and developed the technologies for it. It's not a mysticism anymore. It's a confirmation of our understanding of the technology of the Creation. Many of you will understand that the changes have come through the operation of the system, (and how it effects the structure of our created life on Earth), and not because we decided to bring the change).

It's not any more going to a mosque, or a church, or praying to something. (It's part of what we are, how we do things, and the way we take shape in doing them, the way we allow them to happen. And the way we can see it, to be able to do what we call, bring the change, not for anybody else, but for ourselves. Not to try to impress. We are here to understand. The technology is a technology, because it's understood and can be replicated).

We haven't made just one reactor. We have two flight systems and each one carries around about 14 reactors. And we have 6 Head Units, each one carrying 10 reactors. If you put them all together, we have something like about 140 - 150 systems, each one working in a synchronized manner to create the conditions we want. We saw that, each Chair gives exactly the same effect with most of the people who use them.

So the technology is not a one off, and done accidentally. It's repeated a 140 times. So it's not a technology, it's an industry, it's a commercial system. We can put these reactors in batches of 40 or 100, and send them anywhere around the world. Then you fit it into the frames of the spaceship units, which you have received, and voila, you have a flight system.

(We have the finished spaceship units sitting in China). We can distribute these systems by the end of this year. The body will come from China, and the internal systems will come from the Keshe Foundation Austria. We have a team which can replicate it. The first six systems are ready, and will be used in full capacity in the German operation next month.

(You can literally go from anywhere around the world to the doctors who are using them. This specific use is for refreshing and energizing the body and its cells. It's the job of the doctors to observe, and evaluate, and then together with us to improve the systems. KF is in the space game, and not the medical game).

(We have seen in the past 30 to 40 years, that astronauts have been effected by the interaction of the fields of the universe with them. It has made them go crazy, blind, or become mentally unstable. These things will not happen to you in our systems. You are protected in a cocoon of your own energy. No one can interfere with you, unless you allow it to interfere with itself).

(We come to a new understanding of psychosomatic, where "psycho" or the thinking part works out the "somatic," or the body part. The psychological part puts the body of the man right. The beauty of it is, that it corrects and balances itself, by itself. It develops and understands itself, and then in that process changes the body by itself).

How far you as KS develop this, is entirely up to you, and the scientific organizations who are ready and prepared for the delivery of the Totality. We are ready to deliver the understanding of the system. We are ready to work, not in understanding the system, but to see how you interact with the system.

This business of setting up the technology has taken a long time. But now it's not just a physical technology, it's a scientific (understanding) of the space energy connection. It needs to be understood and set up to bring the change to many of us. (Someone said, "oh, he (just made a single unit and it worked)." No, we have made 140 plus units, and many other units as well, which are sitting developed in the background). (It all can be replicated).

Almost all of the people who sat in (System 1) and most of the people who sat in System 2 felt the same, as well. The same with Chair #3, which was the STM chair. So, the system can be replicated. All you have to do is to tune it, (for the person). We have understood it beautifully.

Those who deliberately came to say it doesn't work, is because they wanted to block it. It's like when you block receiving the love. Somebody can love you as much as they like, but if you don't want to receive love, (then you don't). (Maybe you want something else). It's like being married and you find a mistress, (you always received the same love from the wife but it wasn't good enough for you, you weren't prepared to receive it, even though it was always there, and even better than before. It was because you wanted to receive another love). We clearly saw this in the systems. Some people deliberately

blocked themselves from receiving, or they (said they came to receive, but really they didn't want it), because they weren't ready to handle the change.

(Nevertheless, when we talk to these people weeks later we see that they have changed, and they realized, that they were blocking the system). But as we say, the system has got you by the neck of the fields of your soul, and the interaction of the fields of your life. Physically, you say, no, but emotionally and soul wise, you have been trapped into it.

I said to an Iranian friend, (this machine acts like Iranian girls). Many Iranian girls push you away on top of the table, saying, "no, I don't want you." But they pull you by the leg underneath the table, saying, "I love you." This creates a confusion. (But it allows you to freely choose which one you want to accept, the "no" on top of the table, or the "yes" under the table. Under the table is like your Soul, (it's the love.) While the "no" on top of the table gives you the chance in physicality to get out of it, because it doesn't suit you).

But still we reach you, because once you go into the system, you are receiving the fields of the universe, and it doesn't matter how you fight it, because you are just fighting in the physical dimension, (while the Soul is doing its work underneath). It elevates you, and brings you to understand and to be aware of it.

In many ways, we are ready to deliver a technology that mankind understands and (this makes him responsible for it). And also responsible for the Totality of his environment. (Some of the plants and trees that live around you have been brought there as a hostage from Africa to Europe to work for you). You've got them by the body, but they haven't transferred their souls. The same with the birds, which you brought from one country to another. You trapped their physicality, but their soul still belongs to another position. All of these things will come an end. (If you want them to be with you, for you to enjoy them, then they have to be in a position, that they are happy with there physical and soul condition).

When you see a plant in a greenhouse, it may look like a plant from another continent that is living in your area, but it does not have that freshness and the joy. It's very much like keeping captured lions in the zoos of Europe. And keeping captured plants in the greenhouses of Europe is exactly like that. We see what I call, the sadness in the eyes of the lion, we see the same in the emotion of the plants. These are the things which mankind has forgotten, hasn't forgotten, he never understood.

(There's a big difference between a plant from say Brazil, and a plant that is growing happily in Brazil itself. That is, if you can feel the emotion of the plant. But we ignore it, because it's good for us to ignore it. It's the same when we captured the people of Africa and took them as slaves o America, and wherever. But they are not slaves, and they don't fit into the environment. The freedom of the soul of Africa is still within them. It's the same with the lions and the same with the plants. We take it for granted that we took a plant from such a such a place, because it looks good for how we want it to be. We don't thing about them).

Did you ask it, how it feels to be in captivity? (Where they cannot get the strength they need from the air of their native home. It's like you force feed them to survive. But have you ever thought what means to be a captured plant who has to live in a captive environment, which is not natural for it to exist?)

(What will we do with the people of the universe? Would we bring them back to Earth and lock them up in field zones, that forces them to show themselves in physicality, who they are for the others to see? Or do we invite them, asking them, "would you like to be here to show your beauty? It's like when the mom has to force the children, dragging them by the hand to go visit the grandmother. It's different when the children want to go, then they run ahead because they love to be at Grandma's house). This is what we have to learn. This is the purpose of all these experiments. This is the purpose of our setting up these things. This is why we had you run tests with your MaGrav systems.

Speaking about the MaGrav systems, all of you said, it doesn't work, there is something wrong with it. We have a beautiful news for you. (This week the MaGrav systems we setup with our Iranian team have confirmed that they work. They have the electricity bills to prove it. But the Internet is banned at the moment by the Iranian officials).

(They chose 2 apartments exactly the same, and in the same building to test it. The electricity bill in one of the apartments after 10 months came to 8 dollars, which amounts to about 80 cents a month. Whereas, the electricity bill in the second apartment, which was not using the MaGrav came to 20 to 30 dollars a month. (The difference of 0.8 to 20 dollars a month, it's a huge difference). How come when we build the MaGravs they work?

We teach you, but you don't want to understand what we teach. It's for you to be able to follow the process, and expand the knowledge.

Understanding the work, means understanding the process of the interaction of the fields, and how they achieve new dimensions. If you can follow what we teach, then it will bring the change.

(We have shown you that we can greatly enhance the energy of the MaGrav system. This is the same structure used in EU, in the flight units, and in the Vision units. This process brings us the understanding of the Totality and how the fields interact, and what their interactions bring to which parts. We can bring it to the physical and emotional dimensions, or both together as a totality).

Try to connect the Linz Center and try to understand its position in the fields, then see what it brings to you. Because it's not us anymore. The gift is free for all to access it. (We can transmute you one by one and bring you here to Linz. But the whole process is to create the conditions for Satellite Souls (to spread the fields across the planet). This week we already setup the structure to connect with you, as much as we can across this planet. So when the time comes for the transmutation and transportation, and the Mobile system, we already have established a line of connection. This is the reason for it.

When you come into the system in Linz, you make a connection. Now the system is out there to establish that connection with everything. (but when it comes to you, you are already totally connected with it).

When somebody comes in and says, "I had no feeling, it had no effect on me," we tell them to come back a second time. Out of all the hundred plus people who went through the system, only one or two people, the second time or the third time, said, "it does nothing to me." Then we had to find out why that is.

(Usually people with this problem come here to confirm that they are in control of their physical condition, that they can decide what they receive. In a way, if you don't want to go to the grandma's house, then we don't drag you, we leave you until you are ready to go by yourself. When everybody else has gone, then you think you should go with them).

(We start to bring everything that has been planned together in a structure. Hopefully many of you will start feeling and connecting (to the system in Linz). We are ready to go, just a few more things to setup. The first Enhancement Units will start to be shipped out in the next few weeks. Then we'll deliver the (reactor) systems from Austria to put in the systems, then you'll be able to use them, and fly if you want. It's setup like the MaGravs).

We will deliver the initial Enhancement Units for those who ordered it, if your structure is setup (as in our agreement). We will complete our agreement with the American government in the next few hours or next couple of days. The units to United States will start flowing in. (Our decision is in response to what we've seen ... Once we come to an agreement with the Americans, the Enhancement Units will be released to United States).

A unit will go to Uruguay, and to the Chinese who ordered them. But you have to show us that you have a place to receive it. We'll deliver the first unit within 48 hours, (and the rest later. It's your responsibility to follow the agreements in the signed contract. That means that you have the facility, the doctors, and the scientists to monitor the changes (in the people who use it). Units will also be sent to Germany.

I was not happy with what I saw happening in past 4 weeks in Tehran and around Iran. But what we saw in Ukraine brought us to (our current) conclusion. Nevertheless, our commitment to the Iranian nation stays the same. However, our commitment to the Iranian government was that our technology and what it brings, should not cross the borders of Iran. Iran has never have been aggressive for 300 years and it should have stayed that way. Now they start things in a different way, and we respond the same way.

(This is why) as of today, we're opening the technology as fast as possible. Hopefully within the next few days, we'll come to an agreement with the American and European governments for the rapid release of the technology through the Enhancement Units.

This time we know, that you will not be able to copy our systems, even the Chinese. We invite the Americans to try to copy it, because we don't see America as the "land of freedom." We see in America an opening for the Foundation for what is to come.

On the other hand, all of you who are ready to accept the technology, you also have to be ready to accept not only the consequences, but the beauty which the technology brings. It has to be setup that we start delivering the whole of the technology in one go (across the planet). As of this week, we'll start that process.

We are not worried about what you can do (wrong with the technology), instead we are looking forward to what changes it will bring, and what it will show. The systems we deliver should bring the changes we are looking for. It will be interesting to see how the rest of you enjoy the new technology. It's not about coming to Linz anymore. You'll be able to enjoy the systems in a place near to you, and become part of the change.

Thank you very much for today. I hope you've gotten enough (good news) and you know what is coming. Try (through your Soul) to link up and join with the Linz Center. It is like the love of the Creator is freely spreading (across the planet) . It's there if you are ready to receive it. And we'll see how things turn out.

Today was not a normal break. Mr. Keshe together with Rick talked about some of the products and what you can do with them. The big thing was that 10 new Nano coated mirrors were made and they can be used to create fields, and used together with the EU and with the Mobile and Satellite transmutation.

### **End of Quick Index Part 1 455 KSW**

Q: .Can the Nano coated disks or mirrors be shared with others, with loved ones, and so on? Are they personal?

K- I don't think they are personal. This is a field interaction. You can use it.

They can be used with the Mobile Transmutation. (We will show you how to use them like a stereo headset. They can help make the transmutation very rapid. Only 10 sets were made. They create pure fields for transmutation.

The mirrors are multi-layered fields, and each layer creates a combination of different fields, which covers a large spectrum of fields. Being black, they only absorb. But that's our way of thinking. In fact, they radiate more than they absorb. It's like a black hole, but this time we decide (on how to use the) the black hole. (What is in-between the 2 Nano coated disks, it becomes like what you have in your Gans Box.

Even being black they still radiate fields towards each other and interact with each other. You can use these to try to understand the interaction of the fields. They don't just go in one direction, or absorb everything. They absorb and also radiate. We preset these layers, (and they are coated about 30 to 40 times, that's why it takes so long to make them.

Remember that to see the blackness it takes about 30,000 Nano layers. So, it's a combination of a combination, which increases the multitude of layers, and thus field interactions).

(It's a unique process to make these, and all these different field interactions creates different field strengths. It has a lot of applications. When you start feeling the field strengths then you will understand very quickly the things you can do with them).

Q: I observed that many KS struggle to understand about the power of the emotion of presence for creating world peace, (the purpose of the EU), and the uplifting of the soul of the world leaders. Could you guide us better about this knowledge?

K- (Our emotions are fields, and our fields can interact with world leaders or with anyone. It's how we function, because we are made of all the same amino acid (AA), so we have the connection built into our structure. One day you might dream about a world leader, (as part of these interactions). But especially now, that we are concentrating and focusing all (our) fields to one direction, then we increase the possibility of interacting with the world leaders. (How we make the connection can effect how they perceive what they are doing)).

If I remember correctly, one of the Canadians who was in the Live trials a couple weeks ago said he met with Putin, or he interacted with him. He spoke about something else, and not about the war. (Nevertheless, it shows we have the opportunity to interact with them. Other people in the system said they spoke or connected with the Pope).

We do not create, what we call, a "private phone number" connection. We create a condition for the souls to meet, connect, and interact to be part of. That's all it is. It's not that we give you a private line to (somebody's soul. It's you, through your emotion and intention that opens a channel to someone. It's not a magic show, nor is it that we are going to a special connection and access to someone. We concentrate and we reach them through the Creation).

If war and anger each has a field strength, then so does peace. (When we concentrate on the field strength of peace, we set it up to reach that point. It's the same when we want to feel joy, then we go to a place that makes us happy. We create a condition for it. It's not magic, we are not doing something special. If we want peace then we create the field strength for peace. The same with joy, happiness, or laughter. That's all it is).

(Now we learned that we have access to such a tool to create peace, and we are using that tool to create it. You can use it to create any effect. Before you were not aware of it, but now you are and you can use it, and evolve your understanding of it, to create the peace).

When Mr. Keshe was asked about what is the best ratio between two of the same Gans, to get the best field strength flow between them. He answered, how many men do you want to use to put against another man, or to push a stone. (Basically, you are pushing one against the other to move it in a specific direction. The difference is that, this time we are

talking about a field strength, and the ratio you use is actually by the order of magnitude. It's not that, if you use a ratio of 1 to 2, and then you will get double the effect. With Gans's it's an order of magnitude, because how many Gans particles do you have in a drop of water?)

(At the moment we don't have a Gans particle counter so we can't measure the exact amount of Gans's. We still need to develop technologies where we can measure the exact fields. This morning I was explaining to our team, how to make very preliminary field strength, (plasma) current strength measurement tools for our systems). Because the amp and voltmeters only measure the matter state. Years ago we built a field detector in Switzerland. But we still don't have an instrument to detect plasmatic fields. This will come by research and development. Then we'll see what the next step will be.

(At the moment we really can't create an exact ratio of 1:2 for Gans's, because the number of Gans particles in a drop of water can be thousands of times different than the next drop. This will come as we evolve the technology (T)).

We'll learn how to detect (Gans particles, and whether or not it is of the same isotope. Or is it a different isotope? We'll be able to pinpoint the number of Gans's, because the density of Gans's in each drop is different).

One of the best ways that I have learnt it to use the Gans water instead of the Gans itself. The Gans water is an amalgamation of the fields. That's why we always say, use the Gans water and not the Gans.

Q: Do you think that Iran is utilizing your technology in the Ukraine war on the side of Russia? Is the 5Plus1 talks in Vienna still going on?

K- The 5Plus1 diplomatic talks are still ongoing. It had reached the point of conclusion, but then something happens and the goals get changed.

(I will try to summarize the main points. The internal problems within the Iranian government and what's happening on the streets of Iran are effecting the talks. The concern is that there is some use of drones in Ukraine that might point to Iran using the new plasma technology, to help Russia. But the drones have been made so primitive that the (American technology) cannot electronically jam it. It's possible that this is the reason of their success and not that it is using plasma technology. Mr. Keshe said, plasma technology uses complex fields to jam other electronics, so he doubts that plasma T is being used in Ukraine. But they don't know for sure yet. This goes against the agreement with the Iranian government and cannot be allowed. Iran and the Iranian people are a peaceful nation and have not crossed their borders for 300 years. He used the example of Hitler being Austrian and yet he ruled Germany, that other forces can rule a country).

There is a huge worry that these drones could intentionally or accidentally hit a nuclear power station, the largest in Europe. He informed IAEA that KF has materials ready if needed, like we did in Fukushima. There is also a concern, that if they are successful in

using these weapons, then they might become arrogant and use them in other places as well. We are not like DaVinci going from side to side with better weapons to kill. This is why we have to elevate the soul of the world leaders and create peace through T. That way everybody stay equal with the T and remains peaceful.

In essence, the Ukraine war is a state war between churches, and not between nations. The Russian Orthodox Church is part of the government, and working as a team, on one side, and the Vatican, (which sits hidden in the background) and working with other side.

Q: If members of the Universal Community choose to come to Earth, and wish to manifest themselves as a man, will they land here as an adult in physical form, a child, a newborn, or an elder?

K- They are already here in all shapes. (It's not going to be how you have fantasized, with at UFO landing with lights and aliens coming out. They are already here and you are interacting with them, without knowing it. What counts is what we get from the interaction. It's not going to be a doomsday, it will be a day of interaction and sharing). It will be more open, more transparent, and there will be much more (sharing of knowledge. The learning will go both ways, they will learn and so will we. It's not something new they are already amongst us).

(A lady in London wrote that she meets Mr. Keshe in the U Community. But I was never there to meet her. They use my name to give themselves credibility. It's all a non-sense. Yes, we meet people on Earth, in the teachings and the rest of it. This was started especially by the Romanians. They say they are a special part of the UC. But in fact, we are all part of the UC, because we are part of the universe. It doesn't give anybody a privilege).

There was a question about whether or not Spinoza's thought could help us with understanding plasma science. Wikipedia was read, which said, the doctrine of Spinoza says, that God and the world are the same thing, and this conflicts with both Jewish and Christian teachings. You can read it for further information. No real statement about it was made.

There was a question about how we can extend our lifespan to thousands of years. Mr. Keshe responded, we see long living trees in a stable condition and in stable areas. Olive trees in southern Italy live hundreds and even thousands years old. They replant them somewhere else to survive.

What brings the stability of a long life? Why is man's life short? Why some lives only live just a few seconds, few minutes, or a few days? Is it because we consume too much? Or we use up the energy too fast? Why do some people live longer? Do they have a stable psychological, physiological and food pattern? (Or have the ancestors of some groups learned how to survive longer, and then passed it down through their genes?)

Nowadays we can live longer (through medical intervention. If something goes wrong with the heart, or the leg, we just operate to fix it). Living a life of 80, 100, or even a 1,000 years depends on how much we take, how much we give, and the level of the maturity of the soul.

I think we met a guy in China, who said he was something like 250 years old. We also met the 100 years old former Secretary of Mao Tse Tung. He was tall and walking like a man of 40 or 50 year old. What's their secret of living, or was it due to their ancestral genes, that they were developing the life to live longer and longer?

Essentially the physical life on this planet has two levels, the first is how we live in the physical dimension, and secondly, what is the size of the soul, which needs to be (reached by the time of its maturity? Does the Soul reach its point of maturity after five years? What is the length of time required to fill up it's cup), as we call it? Or do we expand it to 50 or 100 years?

We live a two cycle life. We live a physical life, and an energy cycle life, or life of the Soul as we call it. (When the energy and physical lives match up, then we see the separation. Everyone's cup is not the same).

(We plan to expand on this knowledge in the future. We'll be able to tell what is the size and capacity and the density of the STM in center of the brain). Is it a small or a giant Sun? The Soul can only expand to the size that, that space in the center of the brain allows it to expand. A universe can only expand if there is room for it to expand. If you have a very large balloon, but only a small room, then you can blow as much as you like, but you cannot get it bigger than the size of the room).

Man has not even understood yet why some stars are small and other stars are a million times bigger. What allows it to expand to that size? And can small stars do the same job as the bigger stars do?

(The size the brain allows the STM to expand into, will be important studies for future scientists, because they will tell us a lot about our life. Now you can get tests done to tell what gender the baby will be, or what diseases it will have and the rest of it. In some countries they can even tell you the size, weight, month the baby will be born, the height level in the population it will be). They can give you so much data.

In the future when we have more knowledge and become more mature about the soul of the child in the womb of the mother, we should be able to say when the maturity point of the child will come. For sure we will be able to say when it will separate from physicality.

Now that we know where the Soul is, we can discover its size, and the strength of its fields, and this should give us a good idea of how long it take to fill up "the cup", or should we say, expand into the size the brain has made for it. These information's will be given by the size of the brain and the rest of it.

Then it will not be a surprise to the parents if the doctor tells you, your child will live only 2 hours after birth, or for 20, or 40 years. In much the same way as they now say, "with this disease your child will live this long." This is because now we understand the space, energy, and we can see the strength of (the fields of it). We can say, okay, if you live in this position in this part of the universe, you will live 1 million years. Or if you live in this position, with these fields, you'll live 10 years. This is part of the knowledge.

We see this and a lot of other things in the Enhancement Units (EU). It gives us a lot of indications of these kinds of behaviors. In a few cases we see very clearly, that the Soul still has more expansion to do. (But as of yet, we do not know the size of the room the Soul can expand into. We need to first, physically find its position).

In some parts of the brain, material has grown into the space (allotted for the Soul, so the Soul is already interacting in its physical dimension, as a field. It's like when you have a different magnetic field on the Earth where everything is reversed, but you don't see it, but still it's part of the environment. We have to learn more about these things). Then we will be able to assess the length of life in the physical dimension.

(If we know the child will only live 5 years, because we have control over it, we can decide to let the child grow in the Soul level, which is unlimited. As we all understand the work of the Soul, then we live to the dimension of the existence of that soul, and it will live for thousands of years).

This is what is set to come with this T. It's what is planned by our physical dimension, and everything else.

Nowadays we see people are living a longer life. We have doubled it from 50 to 100 years. But what is the quality of that life? (If you decide you want to live 100 years, then you have to be effective for that 100 years with no pain. Then we have to change the 65 years old pension line. (Today if the pensioner lives beyond the first 5 to 7 years after retiring, then they tend to live a good life for another 20 years. It's because they made it through the pressures of the life change).

It takes 7 years for psychosomatic (illnesses to materialize). If you remain active, then you'll be okay. But if you don't have anything to do, that's when you run into problems. This is the way it is now in the Western world. And that's how the insurance companies make money out of it.

(If we look at the STM, and the amount of space it has to expand in the center of the brain, then we can say, okay, with this brain, this Soul doesn't need to stay in the physical dimension on Earth with all its problems. Let it travel somewhere else to live in another dimension for millions of years, the way the stars do. Because we understand it, now we have that choice).

(The lady in the test last week showed us this when she came out and said, she saw the first soul, and then the second soul leaving her body). Now we become wise to it.

Another gentleman said he felt nothing. Its' because he came in to feel nothing, because he had to prove something to himself, not to us. We knew it before he went in. Then it's something wrong with our system, because he came to prove to himself it's wrong, because that way he proved that he is in charge. We've seen it in 2 other cases too.

How much do we control? What is the size of the STM in the physical dimension? When you look at the MRI, is (the space to be filled) 1 millimeter or 3? (If it has already grown to 3 millimeter, but it started at 2.5 mm, is it a fully matured soul? Or doe sit have to grow another 0.5 mm by gathering more energies from the environment to be a soul of this planet? So, you live 200 years to get that 3 mm space gap filled up. (But what if the child was born with the gap already 2.5 mm full. Is it that now he has only got three years left to live. Then we say the child died accidentally, or the person suddenly died in their sleep).

(Did the maturity get reached with that last breath, that it brought the right energy for the separation from physicality? Putting aside accidental death, we have to understand the new process. Putting aside the understanding of Totality, we need to understand the next step. We don't have this knowledge, it's missing. It's like we never understood about the speed of light until we learned how to measure it. We made tools to measure it and then we could understand it).

(It's the same now with the new technology. We need new tools to measure and understand, and extend the knowledge). Whatever man has learned about science today, is just a speck of dust in the knowledge of the universe to come.

On Earth you can have control over things like the temperature and pressure, (to study it). But in the Universe you can't do that. What happens in the expansion of the different fields strength of the universe? We have a lot to learn yet. As I said, we haven't even stood up yet, to let alone start climbing the ladder, which is a thousand steps high.

No one in the universe has managed to understand the whole process of the Creation, even those who claim that they have. But as a Creator, as a Totality of the Creation, we have the whole knowledge. We see and we know knowledge's from other parts of the universe, which is not ours, but we have access to it. It's like an app, you can lock into and understand what's happening in that part of the universe. (In the future when you understand more knowledge you will look back and say, at that time I didn't know what I know now).

There's a lot to come. We just opened a tiny little peep hole in the door of the knowledge, and you think it's hard to understand, or it's unbelievable. When the door of the knowledge of the universe, or the Creation opens to us, you need to be part of the whole of the Creator to understand the Totality of it. (Now we look at the narrow pinholes of a

pinhole, of a pinhole, of a pinhole, and sometime we think that we understand the Totality).

This is what I (meant by saying), "I am the Messiah." Some of our Knowledge Seekers were taken by a national security and asked, "why does Mr. Keshe say that, he's a Messiah." They explained, "he's a Messiah of his own Soul, and nobody else's." This is what you have to understand. The national security's in one of the country's took people of the Keshe Foundation for interrogation. Why does Mr. Keshe claim to be a Messiah? They answered, yes, he is. He claims to be, but he is a Messiah of his own soul, and not the rest. He shares the knowledge he has.

I always say, I'm a Messiah, but Messiah means for myself, not for you. I can show you the path, the way I went, but it doesn't mean you're going to end up in the same position as I have done. Does it mean the position I'm in, is better than yours, or yours will be better than mine, or with another person? Or does it mean, that we both reached the same point? Now you understand why we share the technology and opened our patents. (2:34). Because now you can assess, where you're going to go.

We need to create new tools that can measure the speed of the M field, the strength of a Soul, and to see the interaction of the Souls. Like when we put two chemicals together and watch how they interact. What happens when we put the soul of this and the soul of that together, how would they interact? Nowadays, I think, in America and Iran and some other countries, you have to do a blood test before you can get a marriage certificate, to see if you match. Would the strength of the souls fit together, which part, and what are we going to get out of it? This is not anymore a dream, it's (a science).

Man will be so busy developing this new science and technology, that he won't even have time to think of war. The challenge of who knows more in science will be more engaging for the human race, than how to make weapons. The knowledge will become an asset of peace, and not to be better than the other. This is what is to come.

First of all, now we know the position of the Sun of our life, which is our Soul, and has been sitting in the center of our physicality. What does this Sun mean? What does the color of it mean? How does it interact and actually move? All this counts, (and we need to learn about it).

(When travelers of the Universe come to us, they will bring us more knowledge. When they tell us they have seen such and such a thing happening in a certain part of the universe, then they can take us there and we can research, and find out what it's about, and add to our knowledge. The way we go to other countries to do research, we'll go to other parts of the U).

Measurement of the Soul, (its strength, and interactions will be one of the prime engagements of the human life in the coming time). It's not anymore what was said, or written 300 years after Christ, because somebody felt that's a good thing to add to the text. Now we are there to test it.

Q: Will the elevation of the soul also result in a change in our DNA?

K- Most probably it will do. It will effect the RNA, and everything is M field, so most probably it will effect the DNA.

R: So in that case, wouldn't it be an indicator, or a test for elevation of the Soul? Since in the last decade or so, mankind can measure DNA.

K- Yeah, but what is interesting, when you speak about DNA. Can we keep on testing the same DNA of a person, every 5 years and see if it stays the same? Or does it change? Our DNA changes, because of the food we eat, the environment we live in. It's part of the evolution.

R: (The scientists have been trained for so long to believe that DNA is not changeable), that it is a permanent structure that gets passed on. But we know that changes to DNA occur in the womb as the baby is growing. These are the same scientists that say, 80% of the DNA is junk DNA. Only now they're starting to find out that it's not really junk. It's got a purpose.

K- Nothing is junk. It's a ladder. It's like when they say, you use only 10 or 20% of your brain, or whatever. It's nonsense. Every single cell in the brain has a use, otherwise it wouldn't be there. There is no non-usable position, it could be a ladder, or a structure to hold others into position. Everything is not like a microchip, (where you have to program every single little bit, to make it do what you want it to do).

Part of the "microchip" you have, is a structure to hold (things together). DNA is made up of different parts. One part is functional, another part is a structural, and another part is for the interaction and functioning of the Totality.

(Scientists tried to say, it was junk, because they couldn't understand what it does. But without these parts the whole thing wouldn't function. .. It's like if you don't have a wire how would the microchips communicate with each other).

(We haven't yet understood which part of the DNA is for the structure, and which part is a field controller. That's because we never understood, even DNA is made up of magnetic fields. Certain parts of it are for shielding for other magnetic fields).

So, when somebody tells you 80% of the brain is not used, excuse me, do you see empty head? If it's there, it has a function. It's been put there according to the structure of the fields of the universe. Every cell has a multiplicity of application and usage. We never understood this.

The cell in the brain of the man is like a switch ball. It depends how is orientated, how the fields around it are effected. Then according to that effect, it has a different application and performs differently. (We say that a cell is in a certain area for a special

function. Yes, that may be true, but only for a specific period of time. What happens when we change that environment?) (Will that cell change its function?)

(We saw this when we tested a helmet made by the Israelis in Belgium for a coma patient. They only looked at the dots on the lines. We looked at how these lines changed according to whatever else we added to it. When it showed no reaction, did it mean the person was dead, or was it because that part was no longer involved in the functioning of that area).

(We haven't understood the multi-functionality of a cell according to its position and strength, and that the same cell creates different positioning, reactions, and emotions in the body of the man).

(Now we understand how the nervous system works. There is so much information going down the (nerves to the extremities). But if you try to measure it by touching the skin, there is no reaction. (But at the same time there is so much energy) going down into the legs, arms, fingers, and to every cell of the body of the man).

When we created the Nano materials, then we were able to understand this phenomena. Because when (you measure the Nano material on the outside, it's super resistor measuring 20 Mega Ohms. But at the same time, inside the Nano material you have no friction, so it's best for running high speed communications. It's like a free space inside). Before KF produced Nano materials this knowledge was not available to us. The scientists didn't understand it.

(But then a guy in a Belgium company decided that this only could only be done with gamma rays, and so he labeled us as criminals and terrorists. All because we discovered Nano layers without using radiation. So in a way, you are all terrorists because you produce Nano layers. Because I was the first to understand and was able to explain it, they made me a terrorist and a criminal).

As we develop the new technologies more new materials will be discovered. It's amazing how KF research is developing and changing every day. The Knowledge of Creator has no limits, except us limiting ourselves according to our own intelligence. The minute somebody tells you, "this is all there is, and there is nothing else," it shows, that you're dealing with an ignorant guy.

Q: The world leaders we are elevating, will they change their position? Will they understand their true divinity?

K- In different ways, we all do. But it depends.

Enlightenment comes out of the time, position and the strength.

We can look for enlightenment all our life and never get it. Or at the age of 2 we can walk into a room, and instantly be enlightened. There's no limitation.

I can add a few more to the 4 world leaders you see on the screen. Are they enlightened? Some of them know the truth, but they cannot say anything, (because they're already part of a system that won't allow it. They cannot go back on what they have joined themselves to. Because now if they become enlightened, they will be kicked out. Because they were sponsored by that system and they came through it).

The 4 leaders on the screen are President Putin, the Pope, the PM of Italy, and the King of England. Have they reached the point of enlightenment, have they understood themselves? If they did, they can't do anything about it, because then they will get kicked out of their organizations?

(Very few people have the audacity to walk away from what they are involved in when they discover the truth. Gorbachev could have done worse, but he walked away from it. We've seen others who have been enlightened, but they didn't do anything).

(I have told this story before. We have a very beautiful KS whose is a diplomat, politician, banker, and everything else. He was originally the head of central bank of a country. Then he was appointed to be the ambassador of his nation to Vatican. He was trusted because Vatican gets a lot of money from his country and other things. Once he told me. He said, you know Mehran, the problem is the world leaders literally, come crawling on the floor to the feet of the Pope. I have seen it with my own eyes. Whether it was accidental or intentional, I have seen them crawling on the floor to the Pope. Of course it's behind closed doors hidden from public. Powerful world leaders are lower than the Pope. What kind of emotion does this create in the man they call the Pope? The things they do to hold on to this power, and what deals they make to get there).

What can King Charles do at the age of 72? He is the generation gap, even though he wants to part of what is happening (now). If you want to run a nation you need to bring in the younger generation, not the old men in their seventies and eighties.

This is why we ask people over the age of 60 to walk away from Universal Council. Because the new life has to come in. Very soon I will leave the KF to be run by the younger ones. I'm there as a name, but it has to be done by the new generations, new things which has got to be done. But we've been witness to a lot of it.

Q: What question would you like humanity to ask you?

K- They ask it every week in these teachings. I'm one of you, but with more knowledge.

(Mr. Keshe said something like, I'm not one of yours, which I think he means, his main soul is not from Earth. And that it needs to be done by a soul from Earth. But then he referred to, "we are no different, but we've seen more of the writing on the wall." )

(Your knowledge is what you have learned, and what is written on the screen, and what you can understand from it. However, we see the bigger screen of Creation. That's why it

may sound strange to you, because you haven't grown in the strength to see what we see, to understand (the way things in reality are).

Q: What does it feel like to know thoughts?

K- Humbleness.

(If anybody had the knowledge and power I carry, while at the same time being detached from wealth and using it only expand the knowledge of the others, then you would have seen them claiming everything on this planet, but hiding behind layers and layers of structure, so as not to be seen. That structure would be a hundred times bigger than the Vatican and God knows what all). (It takes much more power to be a part of the humanity, while at the same time bringing the change through that position).

In the summer of 2004, I walked away from a massive offer by Lockheed Martin. I could have lived a king's life. But then none of this knowledge would have been shared. And today it's being shared across the planet. How many of you saved your life from Corona with the technology? How many of you have used the Gans's for different things, with your pains, pleasures, or whatever? And how much more of the T is coming. Some of you saved money using the MaGravs? This is how it should be. There is no question to ask, it's just that we see a bigger canvas with more painting on it. While man has chosen to be color blind to the sizes and some of the colors on the canvas. That's all.

Q: Do you see souls that are the seeds for the future of humanity, that can expand and enhance humanity and take it forward?

K- Yes, yes.

A KS asked me, what do you see, when you look at something?" I said, you see one thing, while I see two things. You look at the physicality. I see the physicality, and my soul feel the other soul, and my reaction is a combination of the two. We don't ignore the dysfunction, we don't ignore it, but we look at it.

(People come into the Center one way, and leave in a totally different way. They get elevated and a part of their life changes, but not all of it. We have to see what happens to them as time goes on, by the interaction they had in the Center).

(Because we can repeat the systems and experiences it has become a technology. And we can answer any questions about it, logically and scientifically. Therefore, there is no room for theology anymore. Philosophy and theology arose when we had no knowledge of the existence. But now we have part of the knowledge, and the next step is to expand it, and then we'll find all the answers to our questions).

(In the Center we see people going through physical and emotional changes. It becomes very powerful when we see people getting confirmation that they exist, that they matter in life. They can actually say to themselves, "I exist - I am". What we see is mind boggling).

Q: If each soul is unlimited, can they change everything in a moment?

K- For themselves, yes. Most probably, most probably, yes.

Q: Then will that interaction expand out across the world and effect many others?

K- Most probably. It's also how they interact, and what they take from it. This is an ongoing development in progress. It's not something that stops. We look at one angle of when they come in, but we don't look at all the angles when they come in.

(We test a lot of other things in the flight room, materials and other things. The field testers gave us a lot of information. We are getting confirmation that more KS are starting to understand it. This is the important thing. Otherwise we just keep on building systems. When we walk into the rooms we are always observing how we feel, and what the fields are doing. Because it's all fields).

When we get people coming in with disturbed thoughts, or trying to do something, we have a system which we can extract the energy from the room. That system even tells us what the field balance in the room is. The KS who built the system are not aware of its capabilities, they just built it. But when I'm in the room, it gives me a lot of information.

It tells me who is here to take, and who is here to give, and what is the balance. We have a couple who can stop part of our system, because both of them are literally flooding it (with fields). We have another couple who can take everything out of the system and it stops it. Our control panels connect us to what is happening in our systems.

(We have KS who come here and say, they have come to give. But instead they drain our system. Sometimes KS come and say, "I've come here to give to world peace, I have come here to give to humanity." But my system tells me a different story).

If a soul still needs to mature, then it's still receiving more than it's giving. Or it could be taking in on one level, and giving out on another, then our system wouldn't register it.

One of our systems is a giver and a receiver, while the other one can only receive. Sometimes we see the systems go from giving to taking, and then from taking to giving.

(We don't give advice to anybody before they go into the systems, because otherwise it creates preconceived ideas in them. It creates expectations, and then they want to enforce it).

Q: Is there only a certain type of soul that turns up to experience the flight system?

K- Not really, all (kinds of souls turn up here. They take different things, if they feel it).

It will be very interesting to monitor the environment of the Enhancement Center at night, during the weekend, and during the times that we are not there, to see how the plants change? How do they react. And how other things in the environment change. (The

plants downstairs have started having different combinations and coordination of leaves and spacing). They interact with the emotion and with the environment.

(We see amazing things. When somebody says, my soul left or whatever, or I felt I was somewhere else, then we see in the control room, the lights on the panels start flashing. It means a lot. I see when the Soul or the STP is not there. Because everything has a physical measurement, and we can measure it. We can see the fields and the direction of the flow of the fields. One of the systems has a directional flow, we see if it is coming in or going out).

When somebody says, "I am giving." ( I can see if it is true or not by which way the arrows are pointing. It tells the direction of the field flow. When transmutation occurs from one system to another, I can see it on the monitors. The field flow starts to become very strong in one direction).

(The systems can be adjusted to do many different things. The physical transmutation part has been taken out of the system while it is running now and elevating the soul of the planet). There is no way any of you can physically end up in the room, because we have a control over it. It's all switched off. There's no way anyone can turn up in Linz from anywhere. If you were able to get there, then when we come back to the system and open the door, we would see a lot of people running out of the flight room.

(We can program the system for you to stop somewhere during your journey to see different things if you want. We become the decision maker of the time, position and the space. When you mature in the dimension of interaction of the fields and the souls, then you can interact with many souls).

(If you go to a party you know how you interact with other people in physicality, but how do souls interact? Souls don't use language, they use different colored lights which indicates the strength of the fields. So if you are in a party with Souls, then you see flashes of light going on, that's their way of communicating. For example, a specific soul might be blue now and 2 minutes later turn to green, because it interacted with other souls and the energy of it got changed and that changed its color. Right now you could be looking at me as a normal person and you would have a particular color. Then your feelings towards me could change to one of being a friend, then your color would also change. Then if suddenly you wanted to take distance, your color would change again. To us it would feel crazy to live in such a world. It's crazy when you see both worlds, and nothing is hidden in that world. But you choose to close your eyes and not see it). (I wonder if this is what Mr. Keshe sees when he talks to people, the color of their soul changing, and that's how he knows they are up to).

Q: Do souls that come here to visit, do they then decide to go somewhere else?

K- They often do that. You know somebody and suddenly the guy disappears, or goes somewhere else.

(People post security camera footage on the Internet of some strange and amazing things that happen. Sometimes there are horrendous accidents and then you see the people walking away from it).

(Mr. Keshe said this happened to him when he was 19 or 20 years old. He was involved in a very, very bad car accident. As he was going into the accident, he could see himself outside looking down on the accident. The police officers and ambulance people said, it was absolutely impossible for him to have survived it, and without a scratch. They were convinced (there was no way he could have survived), because it was a snowy day and they could track how his car had traveled, and the ferocity of the accident).

It was recorded by the police in Manchester. What happened in that span of time? In those days we didn't have airbag systems for head on collisions, and especially because his car was half the size of a normal car. (Flying meters above ground and walking out of it. When they police came they asked Mr. Keshe if he had seen the driver, because (there was no way to open the drivers door and the engine was in the drivers seat. He said, I'm the driver. They couldn't believe it. There wasn't a scratch on him. If the files are still there you can go and check in the Manchester police department).

Did it happen? Was it caused? Was the Soul aware of the advancement of the physicality, and to what extent? Are we in the position (where the accident took place), and to what extent?

He has been through three accidents like this in his lifetime. Was it a destiny? Or is it part of the life, which is not supposed to end, because you've got something else to do? Or are we from another dimension, that we foresee, and we come out? (That's what we see in the security cameras, people walking out of something that simply can't be). But I have been there three times.

Is it our Soul that takes us out (before the accident)? Or are we perceived to (be in) that position? Or do we choose to be part of that position?

They tested me for drugs and alcohol, and everything else, but I don't touch it. Is the Soul aware of the physicality, and takes it out? We have to understand. We choose to be here, there's a reason for it, or does physicality have nothing to do with it?

It's the same situation as I discuss with you about what's on the table (with releasing the technology). Why is the Foundation is going through the steps that it is going through today, and has been for the past few months? (Is it) because we chose to expand the Foundation in a very rapid way? But a lot of things are not ready around it. (Is that why it's not kicking into its final phase)? Everything has been done. We came to you KS to help us, to collectively do it together.

They accused us of stealing, lying and everything else. But (the release of the T) is not happening. Everything has been done in a totally legal way. But it keeps on holding back. I said to myself, there is a reason for it. But when I look at how much we have expanded

the technology in the past few months, (it's pretty amazing). Would we be where we are today, (if the T would have been released 8 months ago as it was supposed to? Most probably it would have taken us in another direction.

Some have threaten us, saying that they will go public and embarrass us. They say I am a crook. But it's all recorded in black and white, what's been paid, and everything.

When it comes out it will change the life of all of us. Was my Soul aware of this change? Or we brought it through other souls to be where we are, to unify humanity? I don't think (we could have gone a different way). We had no choice, and it is coming. I wanted the Foundation to expand internationally, that it becomes bigger with everything else. But the souls are not yet ready for it. (Therefore, we started developing other parts of the T in the background).

How many KS accuse me of stealing, and being a liar, and a thief, and you promised us. Nothing has changed, because we have entered a legal binding contract (with the people who are going to help us). I'm watching them, "I'm that guy (who went out of his body during) the accident, and is watching from above, what is going on."

How many threats we have received. Calling us liars, and saying they are going to expose us. You stole from us. (We have been getting all of it).

(But when it comes, the same people will say, "I was part of the KF, I was the guy who helped.") We haven't stolen from anybody. We didn't go and crash the car deliberately. How many of you supported this change? How (can you make accusations when we are all in it together. It's all done and ready to go. There is a reason for the delay, but will it come today, tomorrow, or next week. (The way I see it), every delay we have, has brought us to a better position.

(There are souls who are protecting the KF, and they want the change to be here. You can accuse the Foundation of anything you like, but the humanity is not yet ready for what we set up to achieve. Maybe it'll be today, tomorrow, or next year. But I'm the guy outside of the accident, watching. I just tell you what's going to happen. (I am not making any promises. I'm not trying to fool anybody or cover something up).

We are witness to a massive change. You will see it. How many of you will be part of it? It's the supporters of the KF, through your donations, loans, that is bringing the condition of the change. It's not going to be, "oh, he took our money and he ran." (We put all our assets into this change. And we are doing it for all of you. It's not for me. I can live a king's life if I want. All I need to do, is to change the color of my passport. Everything we are doing is all in public. Some of you were there only when it was good for you. Now some of you feel what I've gone through for the past 15 - 20 years. I put everything I have to change the humanity). Are we aware of it? Is my soul aware of it? Most probably, yes.

(We went) public with everything, and that shows how solid we are as an organization. How we stand by ourselves, and that no government pays us, and no organization can interfere with the teaching. Nobody can stop the way we develop things.

(Twelve months ago I foresaw that the time for change had come. I got involved in it, put all the Foundation's assets in it, and then I went to individuals and groups, and I came to you lot and told you what needs to be done. So we are doing it together. How come some of you are only here for the MaGrav system or to get a better health system? How come you're not here, when it comes to getting involved in (and helping the KF bring the change).

(I'm watching the accident from outside, and I see how people are behaving). It's not a manmade accident, but it comes from the clarity of the time and the Soul. I don't lose credibility, it's not my credibility. It's your understanding of your own credibility. I put everything in for 20 years in public, and 20 years before that in private research. If I wanted to cash in on it, I would have cashed in years ago.

But the Soul has chosen to bring humanity to that point, and I have to go with it, with the physicality. (It has to be done in physicality).

Those who are Satellites already are involved in the whole structure in the dimension we know. It's not that we are going to call you, and you're going to be a Satellite. We don't send a message saying we are going to start working today, but not tomorrow. (The system is running today, if you are a Satellite, you are already receiving it). But you have to understand, it's not somebody who knocks on your door, it's not a delivery post. It's the elevation of the Soul, elevation of the understanding.

We have another 8 people left to do the transmutation then we'll go into the Satellite system. The full Satellite part of the work comes when the two new systems arrive in the Center. This is where it will be facilitated, for the position, location, fields, strength, and whatever. With the new systems we can bring both location, fields, environment, and the soul together.

You just got to wait. When the time comes we'll get in touch directly with the Satellite people. You'll receive an email when we are ready, and you'll be switched on. For the Satellite program we have to go through the development process step by step.

There are a lot of KS who do a lot of work for the Foundation. They do and bring a lot, and they open up a lot of things for us.

We have a lot of silent Knowledge Seekers who do a lot of work in the background, because it's for them, and the evolution of humanity.

There was a question about feeling pain during meditation and connecting it to the work, or to past life impressions coming back. Mr. Keshe only said, I don't know. It could be your present condition that is creating that. It depends what you want to connect it with.

Q: Can we get some information from that pain?

K- I presume it's another level of understanding. It's how you interpret and how you understand that pain. (The pain could be connected to another dimension, which you are familiar with, have the understanding, or the training for. It all depends how you interpret it. It doesn't mean that you're wrong. In this world of knowledge of universe nobody's wrong. Because we take it according to our understanding.

There was a discussion about backing up all of KF work on hard drives. The KF has 4 layers of backups. But nevertheless you can think about what you would want to have, if it comes to the point of not being available.

A long complicated question was asked about plasma pressure in capacitors, or something. The answer was that, different plasma layers pressurize each other, more or less. But they always do anyway. If it's doing it, why do you need to pressurize them? Sometimes you need to pressurize them. But you need to know why?

Q: By speaking about negative things do you amplify them. Or can you speak about them as long as your intention is to try to help?

K- I don't know, there are different schools of thought with this one. Some people (think that if you talk about something then you actually you make it happen. It's like you put the soul of the emotion where you want it to be.

(I always do this because I see things. I'm aware of other dimensions of the interaction. But, does it amplify it? Or does it actually bring it out, so that it can be sorted, or worked out? Or you bring it out so it can be elevated. Or if you don't speak about it, you don't give it the importance, and then it goes lower in strength? It depends on the point of the observer).

I have been discussing this for a long, long time. (Do you "leave sleeping dogs lie." Or if you wake them up they might cuddle you.

A KS came on and taught about pain in meditation. Mr. Keshe responded, it all depends on how you interpret it.

**KEY-PHRASES:**

**SUMMARY:**

**ENGLISH TRANSCRIPTION**

Videos (delay and longer intro)

(:28).

K- Good morning, good day to you as usual. Whenever, wherever you're listening to these knowledge sharing of the Keshe Foundation Spaceship Institute. What we call knowledge Sharing. As Rick said, for reasons we have, which work in the background, we had to delay the start, but the start was chosen specifically by Rick in a way what the teachings are going to be today. We usually find a connection somehow with the Intros. You listened to about that three Intros.

The reason for choosing these Intros is a new phase, which the Keshe Foundation has entered in space lab, what we call, in the flight ?? (:30).

This week we had no flight tests. We had people who are they're testing for other things, but no flight tests, no simulation was planned. We have another group maybe next Tuesday, next Wednesday is a national holiday last year, so we'll take a rest. But what we've done, and we use the opportunity, is to change the course, to bring a new dimension. To bring a new way, that we do, or we try to do, what the planet has missed to do. Which means we try to bring that connection between all sections of the life on this planet. The animal kingdom, the solid state, the Man, the soul of the planet, and everything else, which goes with it.

For this reason, as the flight center is not used, is literally like when you're in hospitals. In hospitals, daytime MRIs are for the patients, and nighttime hospitals lend their MRI units for scientific and instrumental registration, if you want to register, or ?? dye, or whatever to do with the systems. For this time of what we call, not using the system till next Tuesday. Yesterday, We and the Keshe Foundation set up something totally different, which means we have a new ?? (the system ) has been working from yesterday, till next week, when we get back in, and we start working. We start seeing and what we can do in the time, that we are not there. (:32).

So, from now on, we'll try during the time when the system is not used, to bring the Center like what we call, elevation of the soul of the planet. In a way, for every aspects. As I said, we are responsible for every living things on this planet, and through the M field, every one of them has positioning themselves in a given position.

A tree has a position, a stone has a position, a man has a position, and an animal has a position, and we move between them. Some of us has decided as a soul construction to stay put. Some of us has decided to move on, as a moving things, or as shaking in the air, as the leaves of the tree. But in essence, as we all know, we are souls.

What we set up in the Flight Center is a system, where we interact with every soul on this planet and beyond. We have set up a transmutation, that going from one system to

another, the fields are available to every soul to elevate itself. For every living soul to be able if need be to tap on it, to tap into it.

We have chosen the blood of Man. We have chosen another condition of the protein of the ?? animals. We have chosen the what we call, the essence of the Soul of the Man (STM), material which created us. We have chosen the soul of the elements of this planet. And we have chosen the elements of the life of the Vertical People. And in that process, with the system we have, we are rapidly expanding. (:34).

We've seen the changes in the past 24 hours, we've seen massive changes, how the school of thoughts, the changes will come. I told you last week, if you felt anything at 7:30 in the morning, a field, which was released by me, in whatever shape. Now it's not me anymore. It's a system, which is like a beacon and shares its fields with all of you. Any of you who tap into the Center, can come to that point. Maybe you can interact with it. Maybe you've been there. Maybe through you, others can interact with, and receive the fields, if you're Soul is ready. It's different than you rushing, "yes," I want to be. Then the Soul says, "oh boy, you're not ready yet. Wait, hang on. I have the telephone number but I'm not dialing. You have not reached that point."

So, in so many ways, from now on, whenever we leave the system on the running position. We allow the level on the Soul, and the Soul of the Physicality (STP) to operate. We have switched off the physical interactions side. And in that process, we have brought a new dimension. As we go in next Tuesday, we will see what it is, and how it will be. And for now, we see how much we have to top up the system, because so much of it is used. The system itself receives as much as it gives.

We would like to see what changes in the colors of the Gans's we put in. We would like to see how they move, how they sit. Then we'll see how you as Knowledge Seekers (KS), (:36). have tapped into it, or other souls without knowing, being at the strength of the elevation has received from it too.

In a way, you don't need to pray to elevate anymore, where in fact, you are elevating continuously. This is very vital for us. This is important for us, to in a way ascertain, to see and to be part of, and see how us as Knowledge Seekers bring the change in.

Those of you who are the Satellites should feel the change. Those of you who are Satellites and registered yourself to be, you could feel the differences in the upcoming. As I told you, we don't tell you anything in advance, that would preset you. There is a condition to it.

We have today, as I informed our first what I call, transmutation person. We start setting the system up to receive the first transmuted person into Linz. There are some criteria, we needed some materials, we have received it. It's getting set up. And we have informed the person, that we start the process. Which means as before, you did not know when we started the first process, with what we call, Enhancement Units. Now we start the process with transmutation.

We are in the position in our system to receive and to send back. We shut one system, that receives and cannot send back, down. That it does not allow confusion, or we receive two parts, or two halves. Our first plan is to see the emotion, (:38). what arrives with the Soul. To see how we feel with the arrival of the Soul. We have to decide, to who will be in the system to receive the soul. It's not just "beam me up Scotty." We have to go, as you've seen with the other tests we did. If the person in the system feels the arrival, feels the arrival of the emotion of the arrival. Then we have to test. We see how and where. This is part of the development of the technology.

This is part that many of you have been waiting for. As we saw with the couple recorded, and you have seen, one felt the other one on her lap. Now we want to feel, if we receive the person in the secondary chair in the back, or on the lap of our person waiting for it to arrive.

The exciting time of the transmutation has it started. The exciting part of bringing that into order has started. It'll be interesting to see how you feel. How you see things. How you as Knowledge Seekers, now that we have the system running, see other souls. Do not consider yourself as crazy, I see things. Consider yourself as, I'm ready to be educated in the world of the Creation.

Don't tell me the tree talks to me, or the stone dances, or the dog tells me he is hungry, because I feel his soul, interact with it, and see how it interacts with you. (:40). Because you see a beautiful child being carried in a cart on the street, people turn around their head, they talk to, and they praise the beauty. Now you are that child. And everybody looks at you, as much as you look outside.

Try to understand the interaction of the field. Do not look for verbal communication unless you're dealing with a man. Understand the emotion of the language, understand the emotion of the interaction of the fields. This is very important for us, as we are preparing the second system to come into operation. To set up the Satellite system. To set up the next phase of transmutation. Take things and see how things have improved. How you suddenly change direction. You don't do the things you wanted to do. The materials you did not want to understand and see. The position you were not considering, which now has become consideration.

We are there to not bring the change by force, we are there to bring the change by understanding. And with it to change. Once we understand we can change ?? ?? do till he's dead .

So as I said, today, in this teaching, while you're all at it listening or thinking, you're all are receiving the fields from the Enhancement Center flight room in Linz.  
( ... phone ..) (:42).

So what we want you to do is to understand this. To understand how, what the planet was short in giving us, we are getting it in a different way. And see, if you're eating habit

changes. See, if you're breathing habit changes. See if your school of thoughts of doing things changes, and suddenly I don't know why.

We will continue with this for months to come. So, as the system is free, we carry on what we call, using it to continuously elevate the what we call, interaction of the fields on this planet, on this, in this area, for those of you who have made a connection by being here, by meeting somebody who's been here, or being in a way, in touch with, and across with the system.

We have set it up to bring the emotion of peace. We have set it up in a way, to bring the soul of peace, and with it, we can and we will show, and we'll make it important for all of us to understand this change. It is part of Foundation's work. And is not just all the time, as I said, Gans making. You made the Gans's, you made the Nano coating. (:44). And you made your systems to see how the fields interact. So you've been through alphabet of what I call, the technology.

Now it's time to make sentences. Now it's time to make letters of peace, using this technology, adding the knowledge of bits and parts together, to be able to make that word, to be able to make that sentence, and to be able to make the letter of peace with the knowledge we have.

As I said to the officials in the past few hours, past few minutes while I was, while you were listening to the Intros, we need the technology to be a tool of peace. And we have to see it, to be with it, to understand it, to make that difference to become, with the correct knowledge.

We are not waiting for changes, we are waiting for us to change. We are not there to wait for Messiah to comes, we know that Messiah is us for our Soul. And it's us who has to decide that time and position. We don't need to die to become a Messiah. We can become Messiah as part of our life, as part of the living, and part of the work we do.

A lot of you are looking for physical interaction for the confirmation, and whatever else comes to you is just a dream. But you have to understand from now on, the dream you call the dream, has been part of you, which you ignored, because you never understood.

There are no more coincidences. There are no more just happened to be. We are there to make it happen. Because the technology, the systems are set. (:46). When we spread these systems across this planet, the way you have done with Gans's, now we connect with you. Now we set the signs, we set the scene, every jar of Gans you have in the house, if it is made by the materials from this planet, and we are made from materials of this planet, they are already made connections. It's you in how you receive it, in which direction you will receive and what you give to it.

Try to understand the Keshe Foundation is the way you are, nothing else. It's not something. It is not a religious organization. It's not a cult, it's not something else. It's the Totality of the work, in how we understand the world of Creation, in a matter state, and in

the field of energy. How energy becomes matter, how matters become energy. Then we take it to the next step. Then we take it to the what we call, understanding of the next step. Then we come to understand, what we need to do ourselves. It does not to be all physical, it does not to be what we call, "show me something." Now is feel me something, that I can ignore, deny, or hide all the feelings, because if I accept it then I know I have reached the point of the maturity.

As I said, we brought you the technology, that it does not stay a mystery and doesn't become a magic show. We build the systems we've brought in, to be part of the process of understanding, and not part of the magic work. (:48). Now, the way we have set the system up, and the way now it's running, as we are speaking now, it brings that change, it brings that position of change, it brings a condition of change for all of us.

And it's important for many of us to understand this, and how we come to understand more and more about the work of the plasma. Interaction of the fields, collaboration of the fields, amalgamation of the fields, division of the fields, cooperation of the fields, clusters of them, or combinations of them. And to understand in Totality, what is there to come, what is the change which is to come, and what each one of them as an interaction an amalgamation, or being adjacent to each other, effects, creates, and brings about.

We've seen any of these, but we never understood. We stood between the two pictures and felt the fields, or what it creates in us emotionally, and what it creates in us physically. Sometimes we feel is our muscle tissue, and sometimes we feel happy to be in it. Sometimes we don't want to be in that field. And now if a painting, a static color can bring that to us emotionally. You can imagine what the dynamic systems which are running in the universe, and the way the fields are running within the Linz Center, (:50). will effect you. You put two pictures and find the interaction between.

We have put two systems and we are not looking the interaction between the four meter separation. We are looking at the interaction of the fields from the other side all the way around this planet, back to the other one.

This is where the systems come into effect. It's a three dimensional system. So, it effects the system sitting in Linz, is not what you see in the room between the two systems. It's what is from the other side of the system, all the way around this planet, to the other, in all directions. What have we, and how we interact. The system does not choose the path. The fields of the universe decide the freedom of the path, which is given to it to cover. Does one of these freedom of the path, comes to your soul, that in a flash of light, you get elevated. In a flash of light you understand something.

As you see with the Knowledge Seekers (KS) who have been through the system. As one said, for an instant I smelled the coffee. That's all it needs, is that instant flash, which makes it to fall in love. It's not something which grows for years. So, what you will see. Watch what you do. Observe how you change in the coming weeks. Observe how you start looking at things in a different way, than you were looking before yesterday.

We put the system into operation about 12 o'clock yesterday, around about 11 to 12 o'clock. See if you felt anything? (:52). Did you wake up with a different emotional feeling? I did. The fields are so deep. I wrote to one of the KS and he wrote back to me how he felt. It's so deep, it's so profound, that it's like opening the eye, opening a new dimension (D), opening to look at the things in a different way, to be.

And it is important for us to understand. It's important for us to be able to develop this knowledge, not for us, but for the others. One of our Knowledge Seekers who is on the line, knows exactly what I'm talking about. We have chosen, if comes, to create the first child through the embodiment of the two systems. I think we have found the perfect partners, and the no possibilities of accident, or something happened. We are so confident in this, that we can take the step forward. Creation of the perfect souls. In a way, now you go to what we call, test tubes to choose the color, to choose the skin color, and eye color, and whatever. Now, we allow the soul to develop that perfect soul for a child to be born in the dimension of the Soul, and then embedded within the womb of the mother.

The technology is so advanced, that this is not a dream anymore. It's the reality, which we can deliver. It was a pleasure to come to this conclusion, that we can, (:54). and we have chosen I think, the right couple for this work. If they decide in the coming weeks and months to do. This brings a new dimension to the work. It brings in dimension, to the life of the man in the space. We are not here to create a child for you to see. We would like to see how the children of the man in the space, when they fall in love and create the next generation, that man knows how to handle. Man knows when he brings the soul to Earth to show them the mother land, what it was, and how it comes.

Bringing a body through the atmospheric condition is with a lot of hazards. Bringing a soul in the dimension of the fields and then transforming it to the physical dimension of the man on Earth is totally different. You'll understand why we are doing this. We are testing, setting up the dimensions and the directions for the future tests, and development generation, and what's to come for us in the space. This is not a fun to do. This is something that we have to do, to be able to perceive and to see what is to come.

Many of you will come to understand the changes has to come by the understanding of the operation of the system, and not by what we call, changes in the system, because we decided to bring the change. We have developed technologies, that is not mysticism anymore. We have developed technologies that, (:56). it is a confirmation of understanding the technology of the Creation. It's not any more going to a mosque, or a church, or praying to something. It's what we are, and the way we do. And the way we take shape in doing it. The way we allow it to happen. And the way we can see it, to be able to what we call, bring the change, not for anybody else, but ourselves. Not to try to impress. We are here to understand. The technology is a technology, when it's understood and can be replicated.

We haven't made one reactor. If you look, we have two system flights, each one carries around about 14 reactors around that. And you have 6 Head Units, each one carrying 10 reactors. And then you have if you put it together, something like about 140 - 150

systems, each one working in synchronized manner to create the condition, which we want. We saw each Chair gives exactly the same effect with most of the people.

So the technology is not one made accidentally. It's repeated a 140 times. So it's not a technology, it's an industry, it's a commercial system. We can put these reactors in batches of 40 or 100, and send them to anywhere around the world. (:58). And then you fit it into the frame you receive. And voila, you have the system.

We have units, which is sitting in China, we can distribute these systems by the end of this year, the body will come from China, and the systems will come from the Keshe Foundation Austria. We have a team which can replicate. The first six systems is already, will be in full capacity use, in German operation next month. You can literally from anywhere around the world go to the doctors who originally started with a field ?? of the KF in their surgery, and literally go through a specific condition preset in the center in Germany.

This is for refreshing, and energizing your body and the cells. And then you'll see what they get out of it. It's the job of the doctors to see, and to observe, and to evaluate, and then with us to improve the system. As many of you know, Keshe Foundation is not in a medical game, we are in a space game.

As you go into space nowadays, we've seen in the past 30 to 40 years, the fields of the universe have made some of our astronauts and cosmonauts, and whatever "nauts", crazy, or blind, or mentally unstable, due to the interaction of the fields of the universe with them. We have covered all those, that will not happen to you in this system, which you will go in, you're protected. You're in a cocoon of your own energy. No one can interfere with, unless you allow it to interfere with itself.

Which means we come to a point that, (1:00). what is known as psychosomatic. Now, the same "psycho" works out the "somatic" of the body of the man to put it right. This is the beauty of what I call, correction by itself, balancing by itself, understanding by itself, developing by itself. And then in that process, bringing the changes by itself to the body of the man.

How much, how far you as Knowledge Seekers will develop this, is entirely up to you, and the scientific organizations which go beyond it, and before it, and in understanding it, we who are ready to prepare for the delivery of the Totality. We are ready to deliver the understanding of the system, we are ready to work, not in understanding the system, but to see how you interact with the system.

In many ways, the business of setting up the technology has taken a long time. But now it's not just the physical technology, it's a scientific space energy connection. It needs to be understood, it needs to be set up that it brings that change to many of us. You've got to realize, as I said, they said, "oh, he made one unit and worked." We have made plus 140 units, plus many other units, which are sitting in the background that is developed, and it'll be coming in to repeat.

You've got to understand, when you sat in the Seat one, almost all of the people felt the same. When you sat in system two, (1:02). most of the people felt the same. When they sat on this chair number three, most of the people felt the same. So, the system is repeatable. All it needs is to tune to, who does, who doesn't. We understood it beautifully.

Those who come in deliberately to say it doesn't work, because they want to block it. It's like when you block receiving the love. Somebody can love you as much as you like, but I don't want this love, I want something else. It's like being married and you find a mistress, the love you receive all the time from the wife it's not good enough, because I'm not prepared to receive it, even though it's always the same and even better than before. Because I want to receive another love. This is what we clearly saw in the systems. People who come in and deliberately block themselves to receive, or they come to stop receiving, but saying they want to receive, because they're not ready to handle the change.

But, we see the change comes afterwards when we talk to them weeks and days later on, that you know something happened because you blocked the system, but the system has got you, as we say, by the neck of the fields of your soul, interaction of the fields of your life. Physically, you say no, but emotionally and soul wise, you have been trapped into it.

I said to an Iranian friend of ours in the Keshe Foundation, this machine is for the people who go in it, it's like the Iranian girls, many girls push you on the table, no, I don't want you. They pull you by the leg under the table, I love you. (1:04). Creates a confusion. But it depends which ones you want to accept, the hand in the front, or the push of the leg under the table, which under the table is the soul of you, and the push away by the hand it's you to say, no, I want to say, no, it didn't work because it suits me that way.

But we reach you. Once you go into the system, you are receiving the fields of the universe, does not matter how you fight it, because you fight in the physical dimension, but the soul works underneath. It elevates you, it brings you to understand, and it brings you to be aware of.

In many ways, we are ready to deliver a technology which man and the mankind understand, and makes it responsible. Also responsible for its Totality of its environment. Where you live, the plants which live around you, the trees you brought as a hostage from Africa to Europe to work. You've got them by the body, but they haven't transferred their souls. The birds which you brought from one country to another, you trapped their physicality, but the soul still belongs to another position. All these will come an end. If I want to be here for you to enjoy me, I have to be in a position to be happy with my condition and soul.

When you go to green house, and you see a plant, looks like a plant from another continent in your area, but does not have that freshness, does not have that joy. It's very much, the man has not understood, he capture a lion in the zoos of Europe, (1:06). it's exactly like a captured plants in the greenhouses of Europe. We see the, what I call, the

sadness in the eye of a lion, we see the same in the emotion of the plant. These are the things which mankind has forgotten, hasn't forgotten, never understood.

When you look at a plant, which is from Africa, or Brazil, or whatever, and then you look at the plant in Brazil the same, you see a big difference. You feel the emotion of the plants. We ignored it, because it was good for us to ignore. Because we captured the slaves, we took them from Africa, made them slaves and took them to America and whatever. But they are not slaves, they don't fit into the environment. They're still, that freedom of the soul of Africa is within them. It's so the same with the lions. So, the same with the plants, which we take as granted that we took a plant from such a such a place, and look how good it looks.

Did you ask it, how does it feel, to be in captivity? And not the air, the strength you need it's just a food you're given because in the air, then you force it. Have you ever thought what means to be a captured captivated plant in a environment, which is not for it to be? But what we learn from, what we do with the people of the universe? Would we bring them back to Earth and lock them up in the field zones, that it shows who they are for the others to see? Or do we invite them, would you like to be here and show your beauty? (1:08). It's different when you take him to the grandma by drag of the hand of the mom, because we are going to Grandma, you come. Or you run ahead, we're going to Grandma because I love to be at Grandma's house.

This is what we have to learn. This is the purpose of all these experiments. This is the purpose of our setting up these things. As I said, we ran your MaGrav systems. We ran your test. And speaking about the MaGrav system, all of you said it doesn't work, there is something wrong with it. We have a beautiful news for you. The MaGrav systems set, I think our Iranian team are here to confirm to you, with the electricity bill they live, they received this week. I think, if you could have the internet, which is now banned by the Iranian officials to talk.

Usually, they chose the two houses, exactly the same two apartments in the same building. They received the bill after 11 months, more or less, 10, 11 months, Keshe Foundation apartment use, for 10 months shows electricity bill of 8 dollars, which was about 80 cents a month. As we've been told, the next door, or same apartment, in the same building, has received a bill around about 20 - 30 dollars a month.

So, we built the MaGrav system, we build a system for the two sets of the houses in Tehran, and the data confirms both the same, and we have seen a difference. How come when we build the MaGrav, set it up the way we taught you, (1:10). we get 80 cents a month electricity bill, for all the air conditioning of the Sun, the heating of the winter and everything else. And next door neighbors pay massively more, massively much more for the same.

In a way, what I was told, the same unit next door, this is my neighbor, this is the writing of our team in Tehran, per month, that is 25 days, it's \$45. That's each month. And the Keshe Foundation setup pays 80 cents. So, we teach you, but you don't want to

understand, what we teach, what we put is for you, as Knowledge Seekers, to understand, and to be able to follow the process, and to see it and to be able to expand the knowledge on it.

To understand the process of understanding, and how we do it, how we expand it, and how we will expand on it. We will bring the process and we will change the process, we'll add to it and, what I said before, I post you a copy of the writing of the report, which we have received, that we can see. (1:12). This is what has come in. Same unit next door, my neighbor, per month, 25 days, 45 dollars. Now, you see how the systems work. Now, you see how the structure works. Now you see how we work in putting everything back together, to be able to let you do the things first, when you can't do it, when we do it, we show the difference.

The understanding of the work is understanding the process of interaction of the fields, how the fields interact, and how the interaction of the fields creates a condition for achieving the new, what we call, dimensions. The new Totality, and at the same time to understand how things can work. What we teach, if you can follow what we teach, if you understand it, how to follow, it brings that change. It brings that step, it brings that understanding of the process of interaction of the fields. Does not matter in a MaGrav, in a flight system and in the process of understanding the Totality.

What we do, what we set up is now to understand the interaction of the fields. If we could enhance the energy by so much in the MaGrav system, the same structure of understanding of the MaGrav system is used in EU, in the flight units, in, what we call, the Vision unit. (1:14). This process brings us the understanding of the Totality. This brings us to understand how fields interact, and what their interaction brings to which part. In a physical dimension, or in the emotional dimension, or in the sense of the Totality of the emotion and physicality together.

Try to connect the Linz Center. Try to understand its position in the field, and try to see what it brings you. Because it's not us anymore. The gift is free to all to access it. We can pick up one by one, and in, what we call, transmutation, to bring you here. The whole process is to create that Satellite conditions. We set up this structure this week, it's literally to connect with, as much as we can across this planet. That when it comes to transmutation and transportation, and mobile system, we already have established a line of connection. This is the reason for it.

As we said, when you come into the system, you make a connection. Now the system is out there to establish that connection with everything. That when it comes to you, it is totally connected, it's already has worked. As we said, if you remember, in the previous teachings, when somebody comes in, says, "I had no feeling, it didn't make any effect for me," we tell them to come back in a second time. Out of all the hundred plus people who went through the system, (1:16). only one or two people, the second time and the third time, they say, it does nothing to me. Then we had to find out what it doesn't do.

It's in a way, we've seen the people who come, to confirm in the physical condition, that they are in control, and they decide what they receive. In a way, if you don't want to go to the grandma, we don't drag you, we leave you till you are ready, everybody else has gone, I should have gone with them too.

In that process, we bring everything to be as it planned to be, a structure to be, and hopefully many of you, start feeling, start connecting. As I said, we are ready to go, we're just about setting everything up to go. The first Enhancement Units will be start getting out this next few weeks. Then with it, we deliver the systems to Austria, to all of you to be able to use it, to be able to fly with it, to be able to work the way we set up, like the MaGravs.

We gave you the MaGrav seven years, and now we show it, the way we do it, it does the same. Now the Enhancement Units. We will deliver the initial Enhancement Units, for those who ordered it, if your structure is set up, and we start sending the units across. We have come, and we'll come to an agreement, complete with the American government in the next few hours, next couple of days.

The units to United States will flow in. (1:18). This is in response to what we've seen, and the decision made, we do. Once we come to agreement with the Americans, in the coming couple of days, the Enhancement Units to United States will be released.

The unit in Uruguay will go through, the Chinese who ordered their units and ?? wanted the refund, you have to show us you have a place to receive it. Within 48 hours we deliver the first unit to you in Chinese, and the rest will come through. It's your responsibility, according to the contract you signed, to have the facility, and the doctors, and the scientists to monitor the changes.

So those of you who ordered your Enhancement Units, we start going through to the delivery of the first units, the next two or three weeks, because the first units are built and we start using it accordingly. The units into Germany will be moved, and we'll start the operation.

As I said, putting the unit working yesterday has brought a lot of facts, how we had to change things. And in fact, I was not happy with what I saw in past four weeks happening in Tehran, and around Iran. What brought us to conclusion, was what we saw in Ukraine. Our commitment to the Iranian nation stays the same. Our commitment to the Iranian government was that, our technology and what it brings, should not cross the borders of Iran. We never have been aggressive for three hundred years and it should have stayed. Now they start things in a different way, we respond the same way.

We're opening the technology rapidly as of today. And hopefully within the next few days, (1:20). we'll come to an agreement with the American government, and the Europeans, for release of the technology rapidly of the Enhancement Units.

So, our Chinese friend who are looking for the system, your system is down the road, you have to pay the balance of what you committed yourself, show us the premises you have. Show us the doctors who accept the responsibility. We have a doctor in China who would accept the responsibility for it, and we deliver the Enhancement to you within the next 48 hours. We are ready to go.

And we know this time, you cannot copy our systems, even for the Chinese. We invite the Americans to copy it, because we don't see America as the land of freedom. We see in America an opening for the Foundation for what is to come. ..

On the other hand, all of you who are ready to accept the technology, you have to be ready to accept the consequences, and the beauty which the technology brings. It has to be set, and it will be setup, that we start delivering the whole of the technology in one go, as of this week. We are not worried about what you can do, we are looking forward to what it brings, and what will change, and what it will show. The systems we deliver should bring that changes, which we are looking for. It'll be interesting to see how the rest of you enjoy the new technology. It's not coming to Linz anymore, (1:22). it's where you can go near, to enjoy it near you, and how you can become part of it.

Thank you very much for today. I hope you've got enough, you know what it's coming, and try to link and join with the Linz Center. It is like a love of the Creator, it's freely spreading. It's there if you're ready to receive it. And we'll see how things turn up. If there are any questions, please let us know after the break. We'll make a few more new things which is sitting in KF. For a lot of you that might use, for the development of the technology.

Rick, would you like us, to take us for a break. . If you can, it's a ?? regular things, show the pictures, and the paintings, and the health Units, and the new discs that people can see what is on the site, of our regular systems which you show, if it is possible.

**Proofed to HERE >>**

**<<< BREAK >>** 455 KSW October 20, 2022

(working break today .. Mr. Keshe talks about products with Rick no videos )

K- In the store, yes. And if we can explain it, you can read it. The people can see what ?? is technology, because we get the same things every week.

The new the new discs have come in. It took us nearly two years to produce 10 new discs. With this disc you will learn, we'll do a lot in the future. It's taken months to produce these (10) units. And it's a pair of them, which they come back in. If you got it there. There is a new sculpture, which has come in, and new paintings, which has been added to the system. There are new products, new Pain Pens, new Pain pads, which is coming out of the factory in Iran. (1:24). We start delivering those in the next month or two. So the Pain Pads which we stopped about a few months ago. They're back into stock from next week or so. But this time, it's a new production. And it's about 3,000 Pens, which is more or less completed in Iran. The MaGrav units coming out of the Iranian factory.

You got the new what we call, Gans production, which is an Iranian team has evolved in ?? evaluation and into production. And they have increased according to their statistic, more than six or seven times, than the normal production. We have added, we have adjusted it, and it works beautifully in production of Gans's.

Would you like to go ahead, I'll leave it to you to explain.

R: Okay, or what came up One link that I have is for the plasma field mirrors, which we see on the screen here. Now, let me put the link, direct link for that into our chat for everyone. And into the other chats as well.

Okay, so this is the plasma fields mirrors. And you can see from the images of the size, and kind of what they look like. They stay inside the packages. And it says, plasma field mirrors, handy and portable educational tools. (1:26). They help you to interact with plasmatic fields and to release emotional blockage, they bring balance to your entire fields. They are made in more than 30 to 40 Nano coating sessions. During this time, we cover up the wide spectrum of field interactions between the soul and body inside the nanostructure using the special combination of Gans's in conjunction with Nano layers. To create the strongly compressed field, the process takes in average between 2 and 3 months for one mirror. The mirrors are designed to be used as a pair, one mirror for each hand. They are also highly recommended to be used in conjunction with every type of plasma unit. Additionally they can be used to build and test plasmatic systems. And it mentions that the mirrors are sealed in order to protect from damage of the Nano coating material. So do not open, it says.

K- You see, the thing is with this mirrors, it's like now we see it with the paintings. When people go in between them, in a bigger scale, but in a looser way. This was put out three, four years ago. Every year, we can produce a very limited number, as we said, take two, three months to produce one pair. Ten of them has been released this week by the Keshe Foundation manufacturing. It takes us a year or two to do any more of them. It's very time consuming.

As I said, (1:28). the bigger version of this is the paintings. People go in between the paintings and feel the changes, or the fields. Now, you will see it what we release. But this is much stronger, it's a much stronger fields.

It's very useful, especially for those of you who join the transmutation on the Mobile system. We'll tell you as you, as we said, you need a stereo system. These systems will change. We'll tell you how to connect, to be able to bring that, much more balanced fields for the transmutation. It's very limited number, it's working, we release it, those of you who bought the previous one and these, we'll come to you for testing on the transportation and transmutation in the very near future.  
Carry on.

R: Okay, let's see what else we have here. Well, in new released products, well, we have the satellites and flight simulation experiences. But also, as Mr. Keshe mentioned, there's the Gans paintings. I think we showed. Well, I know we've shown these before, and a number of them are sold out. You can see most of the previous ones that were shown are now sold out.

K- We have commissioned, we have requested for two artists, to gather their the works of the Gans, and we support them with the Gans's which is necessary for them to set up the first painting exhibition of the Keshe Foundation. (1:30). We have talked to the people who do art exhibitions, we gave them the premises of the Keshe Foundation on the two floors amongst all the systems we have set up.

So soon you can enter, or attend, or come to the first Gans art exhibition. Talking to one of our Knowledge Seekers who work closely with us, he has offered us the Exhibition Center in Venice, in Italy, for the show of the work of the artist. He's a very good Knowledge Seekers working with , and around the Foundation. Setting up art galleries is his work. He has, he's agreed to, or he likes to run the Exhibition. So the artists who work, start working with the Gans's, we give you an international platform, that not only shows the beauty of the Gans's, but it shows how it's used in another way.

Aligned with the same thing, if you remember, our Knowledge Seeker from France, a few weeks ago, showed the use of the Gans production in the vineyards of France. In the next couple of weeks, hopefully, the Keshe Foundation for the first time, we'll put this bottles of wine, which has been sent to Keshe Foundation, that, if any of you would like to order, we put you, most probably, through directly, to the what we call, the vineyard, the arrangement has to be made, or Keshe Foundation puts you through to the facilities that you can order wines, which are made through Gans's, Gans system production, which Joel showed us. Then we'll go for that process, depending what he agrees, arrangements are made in the vineyard and the delivery. (1:32). So, we start actually showing the art and agricultural products of the Gans production.  
Carry on Rick.

R: We've seen some of the previous images. I think these ones might be sold now. Loop is still available. I don't know if that's updated or not. But loop, would be the infinity loop here. And they come in as a pair. That's one new product. And there's also, you have this sculpture work. Plasma spiral and plasma pyramid.

K- One of the sculptures has already sold. This is sculpture is already sold. There's a second one, which is coming in ?? go ??. This one is sold, it was sold in the first days. We start showing the application of the Gans's, if you're an artist, and as we said, you can bring your work and allows you to show what capabilities the technology has.

R: And what else do we have here? (1:34).

K- The new MaGrav systems from Iran is more or less the same.

R: This one here, the home enhancement plasma power unit.

K- Yes, there is a number of these which is sold. We're waiting for export licenses to be issued in Iran to be shipped out, and should be done within the next month or so. These Enhancement Unit, our team in Iran tell us, it's much more effective than the MaGrav units, which you saw creating a dollar bill. They think it reaches at much faster. Because they're testing it, they've seen it. As I was told, you hardly see any amperage usage, which means no power is used. It'll be interesting to see for those who bought, especially in the US, now we are coming to an agreement with Americans to ship the goods out directly to US, how it will manifest itself. I will show it soon.

R: Mr. Keshe, this mentions this is a trial system and so on.

K- Yes.

R: Offer ended the 20th of July.

K- It stays the same, but now, the deliver for those who ordered is getting done. The materials has been put together, the structure. Now, we have to get export certificates, to get licenses and some permissions for it.

The only energy system which Keshe Foundation now, offers is the present MaGrav systems and, what you call, the Combination Electric Gas unit, which is to be delivered from January onwards. (1:36).

Okay, we've done the commercialization part. Would you like to see if you can go on the questions.

(End of Break)

If you're an artist, if you do anything, not necessarily the art if you develop something. We had Canadians with us last week, or the week before, and they brought with them something, but they left it on their bus or train. I said to them, bring it in, if you find it, get it back to us. We promote you, we promote the material you make.

It's there, we opened our patents for you to be able to enjoy it and develop with your knowledge. Now we give you the ground for it to do, to be able to show what can commercialize. Soon we get more and more, the new website hopefully gets completed. You can literally run your shop on the back of the Keshe Foundation Shop. In the next few weeks, hopefully, when our team complete this, you can like, what we call, Amazon, or whatever, open your own shop on the website of the KF, the Store of the KF, as a

commerce, what you call it, website. From B to B, or A to B, or whichever you want to do it. This allows.

That's what we said, about setting up the intellectual, know-how, and research website. You come up with something, you put it there, and it's the responsibility of the people to respect it, and to help you, or to cover you for what they use from your technology. (1:38).

Okay, let's go to anything else.

Q: .. Can the mirrors be shared with others, with loved ones, and so on? Are they personal?

K- I don't think they are personal. This is a field interaction. You can use it. They just came out at the right time, especially for the Mobile units. They came just about the right time. I don't know if will take us another month, two months, maybe next year sometime, we'll release some more. But, those who buy this we keep a track of when they come back to you.

We tell you how to set them up to use them as a stereo head unit, but this one we can use for transmutation very rapidly. It's only, what I call, 10 sets of them, and this gives us a very good, what you call it, test ground, pure fields for transmutation.

Q: Can you expand on what the mirrors actually do, please?

K- The mirrors are multi-layer fields. And each layer creates a combination of different fields which covers a large spectrum of fields. Being black, they only absorb. But that's what is our ?? way of thinking. But in fact, they radiate more than they absorb. It's like a black hole, but this time we decide the black hole.

As very much like, what we call, (1:40). in plates, if you remember we take the plates, we Nano coat them, and a non-Nano coated, or we put two Nano coated plates in a Gans Box. Now the media is what is in between it.

So, even being black, they still radiate fields towards each other, to each other, and how they interact with each other. This is interesting for, what I call, the understanding of the interaction of the fields. It's not just that one goes to one direction, or absorbs everything. We preset these layers, and when you have 30, 40 layers of Gans's, what you call it, Nano material, to create that one layer you need at least another 10,000, 20,000, 30,000 layers to make that layer. So, it's a combination. It's a combination of combination, increasing the multitude of layers.

This is what we are looking at. Increasing the, what we call, the possibility of Creation of more different field strength. It's unique to make these. It has a lot of applications. Then a lot of, what we call, you enjoy if you feel if you can feel it, if you can feel the fields interaction, you will understand very quickly the things you can do with it. .. (1:42).

Q: .. I observed that many Knowledge Seekers struggle to understand about the power of the emotion of presence in the formation of the peace summit, the improvement unit, and the uplifting of the soul of world leaders. Could you guide us better about this knowledge? Thank you for the guidance. (1:44).

K- Can you repeat the question?

Q: I observed that many Knowledge Seekers struggle to understand about the power of the emotion of presence in the formation of the peace summit, the improvement unit and the uplifting of the soul of world leaders. Could you guide us better about this knowledge?

K- It is something you interact with the world leaders, with anyone. Because we are made of all the same. We are made from the same amino acid (AA). You might have a dream about a world leader one day. But now with concentrating and directing all the fields to one direction, we make it possible to extend, to increase the possibility of interaction, and how they perceive and how they see, and how you make a connection.

In one of the trials we had a couple of weeks ago with the Canadians, if I remember correctly, one of them said he met with Putin, I think, if I am correct, or he interacted with him. He spoke about something else, but not about war or whatever. So, it gives that opportunity. We've seen people who in the system, they speak to Pope, or they have a connection, it's what they wanted to do.

We do not create, what we call, a private phone number connection. We create a condition for, what I call, (1:46). the souls to meet, or to connect to, to interact to be part of. That's all it is. It's not that we give you a private line to, it's you who opens that channel themselves. It's not a magic show, it is not that, is going to be something different. It's not that, is going to be, we have a special connection and access, you can use us to reach ?? creation. We concentrate, we put all. This is what, it can be explained in an easy way.

If war has a field strength, if anger has a field strength, so has a peace a field strength. So, when we concentrate on the strength of the fields of peace, this is what happens. This is what we see, this is what we perceive, we set it up to, what you call it, to reach that point.

We want to feel a joy, we go to a place to find something which makes us happy, we create a condition that, we want peace. For that we create a field strength of, the way we create a field strength of the joy, or happiness, or laughter. That's all it is. It's no magic, it is not something we do special.

We just learned that we have access to such a tool. And how we want to use that tool. That's straightforward about what is happening, and what you do when you use it for any effect. (1:48). You were not aware of it, now you have it, you can use it, you can evolve it, and you can enter it.

Any other question?

Q: .. What is the best ratio between two of the same Gans, to get the best field flow strength between them?

K- It's how many man you want to put against another man, to push a stone and one pushing against, or moving in a specific direction. But this time we are talking about a field strength.

(... My headphone got trapped in a hook).

So, it is how much you want to do by the ratio of magnitude of order.

It's not if you do 1 to 2, you will get double the effect. It's an order of magnitude. How much, how many Gans's.

We don't have a Gans's counter at the moment to, what you call it, to measure the exact amount. We don't have, what you call it. (1:50). We haven't developed technologies to measure the exact fields. Today this morning, I was explaining to our team, how to make the very preliminary field strength, current strength measurement tools for our systems.

Because with a voltmeter, with an amp-meter, we can connect to measure matter state. We don't have. We have field detectors, which we built years ago in Switzerland. But we don't have a Plasmatic field detectors yet. This is what is to come by research and development. Then we'll see what the next step will be.

But one to two ratio, was it the same amount of Gans's which you chose, because a drop of Gans has thousands .. of times, thousands different, than another drop of Gans, amount in it. So, this comes as an evolution, as a process.

We'll learn how to detect, and is it of the same isotope of the Gans? Or is it different isotopes? And how many of each, the way in matter state now we can pinpoint. It takes time with the research and development to pinpoint and develop that side. But in essence, when you do one to two ratio, did you exactly measure the same amount of drops? And was it the same density of the Gans's in the liquid when you chose, or water?

One of the best ways I have learned is, don't use Gans's, but use Gans water, (1:52). which is an amalgamation of fields, and that's why we always say, use the Gans water and not the Gans.

Any other question?

Q: Salomea .. I'm so glad that your unit of fly, is an instrument for creating peace. Because I am peace, I am "Salomea," which means peace. So my aim on this Earth is to bring peace at the soul level. And I am so happy that I found you. And together with the Foundation, we can create peace on this Earth.

My question now is related with this conflict at international level with Ukraine, and Russia, and Keshe Technology and Iran. Do you think that Iran utilize your technology

on this war and on this conflict? And what we can do to stop them? You start to say something, but I didn't understand very well. Could you clarify? Thank you. (1:54).

K- What you mean by, "I started something?"

Q: I mean, at diplomatic level, because at the soul level we do. But I know that you are involved in diplomacy. I don't know if still conference on Vienna, diplomatic conference, they still on (5plus1)...

K- The diplomatic talks, on the 5Plus1 is ongoing. It's reached a point of conclusion. It's just that, every time one moves, the other one changes the post slightly, then they react to it, and they change something else, and they start negotiating on a new point. The principle... and it is ongoing, and we see ...

<< audio of K breaks here >>

K- So, we have to see what the other bits will come to. It's not the diplomacy. Now we see, there is another, what you call it, a spanner in the work, with the situation which has happened in Iran with whatever is going internally, and there is another new developments.

Again, we've seen, as you said, use of the technologies of, very primitive use of the technology, which is pinpointing towards Iran, in Ukraine. These are not acceptable in any shape or form, with the way we work. We'll see how things will come. We'll see how things will take shape. It's not the way we envisage the work.

Iranian nation is a peaceful nation. You've got to understand, the government of a nation, is not necessarily the people of the nation. Hitler was Austrian, and he took Germany into war as a leader. (1:58). Because he had a different criteria, and he built his way that way. We see this now, in certain sections of sectors of different governments. As I always said, just because you got a mustache it's not your uncle. This is what we have. This is what we need to add to. This is what we want to add to.

We communicate with both sides, we stay loyal to the nation of Iran, the same as we supported the other actions, and what we do, and what we move. It is for the, what you call, how the government's take this position, and what will turn up.

As I just explained, about the time of Hitler, if you remember, when they had these rockets, the very first rocket we got to know, they just pointed them at a certain direction, and they landed wherever they landed in London. The new drones we see used in Ukraine, pointed to, having the source of production in Iran, they are of the same. There is no... It's one of the most basic systems you could ever built.

They say, it's so primitive. But I don't look at it that way. As I explained to the American officials, the way we look at it, they made it so primitive, that no electronic jamming can come into it. It's looking at the whole principle in a different way.

Does it use our technology at this primitive stage? No. Because we have made systems so complicated, (2:00). to interact, to jam. These systems fly literally on the seat of their pants, as we get reports, and we see it's coming out of, in what we see in Kiev.

So, it is to understand, are they using Keshe Foundation technology? I don't know yet. We believe not, because it's a very sophisticated if it comes in, and those who see us, tell us, what we get report of, these are very primitive systems. But it's been built in a different direction. But is there a need for such a thing? It's something we have to see how we can handle it, how it can be processed, how our, what we call it, the next step will be.

There is a huge worry, I was talking to a couple of people in past few days, if what we saw in Tehran in past few weeks, and what we see now reports in other direction, would these people stop with this process? Or seeing it as a success, and they can do what they like, would them bring to become more arrogant, we see more hotspots created?

And this is why, what we call, the elevation of the soul of these leaders, needed to be done. We'll see what we come up with, and how we come up with, and what we see. But we will take actions to, what you call it, to interact, and to be part of. (2:02). We sit there to, what you call it, advise or bring a new position, and to be part of to create peace through technology.

We are not in time of DaVinci, going from one house to another offering better tools, and creating another dimension, that creates the next one to be more powerful. We have to share the technology, that everybody stays equal, and cannot be abused, and create that condition of peace. This is what we're sitting in with, and this is what we are looking for.

According to what we had in the first week of January this year, peace talks was 100% completed, till both sides moved the goalpost, as they thought they had the upper hand in January. Then we saw it in March, what happened. And interaction of other nations came into it. Talks are complete, peace talks five plus one is 97 or 99% complete. But we see new sanctions put, added, that aggravated the situation. But Iranian moved again to, and in the past few days what we see coming out of Ukraine, definitely creates a bigger, tighter restrictions sanctions on bigger layer of Iranian organizations. Because they got involved in something which they should have not been involved, in a way, as they see it, as the other side sees it. (2:04).

The biggest worry for us as Keshe Foundation is if this escalates, and one of these missiles, by accident or deliberately, hits one of the nuclear power stations. We've seen energy points have been targeted heavily by these attacks from both side. But would it come push to shove, of shove to push, where one decides, "now I'm going do something." The largest nuclear power station in Europe sits in Ukraine.

We already know a lot of problems in the IAEA, trying to get some hold on it. But, what is the outcome? We do not know. As I informed IAEA, we have brought materials on hold, and we are producing materials if need be, as many of you saw with Fukushima,

when Yukoko went to Fukushima and tested, and showed the absorption of the fields, and then they took over the other parts of it, which we gave the analysis and the work with.

This is part of the work we do. But essentially, we stay the same. I know as Romanians, many of you are worried about your borders with Ukraine, and a number of Ukrainians are coming to your borders and what is it, get transported across borders. But, in essence this is a state war between churches, not between nations. (2:06). Russia .. Orthodox Church, is part of the government, and part of the structure of the two working ?? team. The same is Vatican and other parts.

Any other questions?

Q: .. If a Universal Community (member) chooses to come to Earth, and wishes to manifest itself as a man, will he or she land as an adult, in physical form, or as a child, a newborn, or an elder?

K- They are already here in all shapes. It's not that there's going to be a time when you call, you see a UFO, and you see people, or you see the lights. You're already interacting with them. It's how we interact and what we get from it, counts. It's not something, it's going to happen, it's going to be a doomsday, it will be a day of interaction.

It will be more open, it'll be more transparent, it'll be much more learning. As I said, there's not learning one way, it's a learning for both sides. Amongst us, or us amongst them, is not something new. (2:08).

So, when you're hoping that Universal Community. I heard somebody written recently that, Mr. Keshe and the lady in London, meet in the Universal Community. I never been there to meet. But they use my name to get themselves credibility. I meet with Mr. Keshe in the Universal Community, what a non-sense.

But yes, we meet on Earth, in teachings and the rest of it, but they started these things, especially from the Romanians. That they have a special, or they're part of UC. We are all part of the Universal Community, because we are part of the universe. It doesn't give anybody a privilege.

I see this situation in Romanian community and a couple of other communities. That, especially has been said, we meet with Mr. Keshe in Universal Community. Yes, we meet on Earth, it's part of the Universal Community, like the rest of it. They try to use it to make themselves credible. If you do, please give me the address where the meeting was. At least we know we attended some without knowing it, even at the soul level.

Any other question?

We are part of the existing structure. We are not oddity. We are not something kept in the black box away from anybody else. If you go to the caves of central France, you see the drawings from thousands of years ago on the walls of the caves. So, it's not something we

just seen. (2:10). If they've been there that long, how many of them have stayed behind?  
It's a beautiful place to live

Q: How much can Spinoza thought help us in understanding plasma science?

K- Can somebody explain to me what is Spinoza?

R: Spinoza, I'm trying to look up here in our friend Google. It's a person involved in a philosophy or a way of life, apparently, and it's often identified as Pantheism, the doctrine that God and the world are the same thing, which conflicts with both Jewish and Christian teachings, it mentions.

K- What? Repeat again.

R: Spinoza, this Baruch Spinoza, who is this. Let's look them up in Wikipedia, maybe that will help us. It's a Dutch philosopher in the 1670s. An important philosopher. Well, we have to get into it here I guess. ?? how he is rejected by these various communities and so on. (2:12).

K- What do you see?

R: Okay, for Spinoza the whole of the natural universe is made of one substance, God, or was the same nature and its modifications or modes.

K- So, what was the question again?

R: I don't know how to get into this simply, it's all about philosophy, and about how is defined God. It's a substance consisting of infinite attributes, each of which expresses eternal and infinite essence. And since no cause or reason can prevent such a being from existing, it therefore must exist. And so on and so forth. Bunch of arguments for and against, and so on. So, Paulo's asking how much can the thought of Spinoza, or people who follow him apparently, his philosophy, help us in understanding plasma science? I would say that so far, we haven't needed it to understand any of the plasma science, but maybe it'll help somebody get to the point where they start to appreciate plasma science somehow through this person. But it was like a lot to get into here, without giving it proper time. (2:14). You'd probably need an hour to argue the ins and outs if you don't know it already. Okay, move along.

K- Ok, I think you answered a good question.

Q: ... On the first day you said in your first health teaching. You said, once human beings has found the meaning of life, have no greedy, but just live happily, then human being will live on Earth for six or seven hundred years, or even one or two thousand years. Just like the other creatures in the universe. So, you mentioned that the trees have lived in jungle for several thousand of years, is that different from human? Can human not living that long. So, human live only because of their own choice, and a fingerprint embedded in bone structures. So he wants to ask, what do you mean by understand the meaning of life? What does this mean? If we understand this, can we extend our life?

K- We see long living trees in a stable conditions, stable areas, you'll see olive trees. (2:16). We've seen olive trees in southern Italy years ago, they live hundreds, thousands

years old, they say some of them it's 2,000 years old, and they don't destroy them, the tree. They pick them up and replant them somewhere else to survive.

What brings the stability of a long life? Why man's life is short by animals? Why some of what was said last time, some lives have just a few seconds, few minutes? A few days, or man lives longer? Is it because we consume too much? Or is it we spend too fast the energy? What happens to the people who live longer? Do they have a stable psychological, and physiological and food pattern? Or have they come from the genes, who did this and survive longer, and it's in their genes?

Now we live longer because we interfere with medical interference. Something goes wrong with the heart, or something goes wrong with the leg, we just operate to change something. Living a life 80 years, a hundred years, thousand years, it depends how much we take, how much we give and what is the level of maturity of the soul.

I think we met a guy in China, he was saying, he was 250 something years old, 3 years ago. We met Secretary of Mao Tse Tung, at 100 years, is tall and walking like a 40 or 50 year old man. (2:18). What's the secret of taking, what's the secret of living, that they have found, or it has been in their ancestral gene. It has been developed further, and further, and further?

What essentially if life, physical life on this planet has two levels. One (is) how we live in the physical dimension. And what is the size of the soul which needs to be fulfilled within the central body of the man, that reaches his point of maturity? Is our soul reached a point of maturity after five years, to fill up it's cup, as we call it?

Or does it need, or do we expand it to be 50 years, or 100 years? We live a two cycle life. We live a physical life, we live an energy cycle life, and when the energy and physical match up, then we see the difference. Then we see the separation. Each one's cup is not the same.

In the future, this is something which we plan to expand into understanding, for the knowledge, for the science, to understand. Is that, what is the size, what's the capacity? What is the density of the fields of the Soul of the Man in the center of the brain of the man? Is it a small Sun, is a giant Sun? (2:20).

The Soul can only expand to the size of that gap. As I said many times, a Solar System cannot expand, a universe cannot expand, unless there's a room that it allows it to expand into. You can have a very big balloon, in a small room, you can blow as much as you like. You cannot get bigger than the room is given to. Or you can have a balloon, you blow it to the shape and the size of this room, you have given it to.

One thing which we have not understood, and at the moment is not, man has not even come to understand it, is, we can, we should be able to. Like the way we see the stars, we said the Sun is a small star, we have another star which is 50,000 time, 1 million time bigger than our Sun. What allows it to expand to that, to be, or does it give it a bigger

strength because it's so (much) bigger? Would a very small neutron Sun, do the same job as a Sun, which is million times bigger than it.

These are the investigations for the scientists in the future in regard to the brain of the Man. So, when it comes to our birth, when it comes at the point of birth, now we go and we get tested, and they tell you what gender you going to be, what diseases you are going to have, and the rest of it. Some countries, they even tell you the month you're born, with the size and your weight, what level you'll in the population, how tall are the highest level, or medium level, height or whatever. When you follow the chart, you see it fits into it, because it's so much data.

In a coming time, (2:22). when we become more mature in this subject, with the soul of the child in the womb of the mother, and the size of it, the light of it, whatever, we should be able to say the maturity point of the life of the child's separation from physicality. That's for sure. We didn't have ultra sounds, we didn't have MRIs, we didn't have things, we built the technology, we built the machines, and with this we can say how old the child is, what is going to be the date of birth and everything else of it.

In a coming time, we can literally, if you understand, know the size, and the source, and the strength of the fields of the Soul, the position of it, now we know where it is. It should give us a very good indication that, how long will it take to fill this cup up. Considering the expansion, the growth and the space will be given by the size of the brain and the rest of it.

It will not be a surprise to the parents if the doctor tells you, this child will live two hours after birth, or 20 years, or 40 years. The way we now say, with this disease you're going die at this time. Because now we understand the space, the energy, we can see the strength of it. And we say, okay, if you live in this position in this part of the universe, you will live 1 million years, if you live in this position, these are the fields of it, you live 10 years.

This is the part of the knowledge. We see this a lot in the Enhancement Units. In the Enhancement Units, we will see a lot of things, it gives us a lot of indications of these kinds of behaviors. (2:24). In few cases, we see it very clearly, the Soul still has expansion to do, the soul has. But we do not know the size of the room in the brain, we don't have an MRI of it, we don't have the physically find the position of it.

In some part of the brain, the material has grown into the space of the Soul. So, Soul has already interacting in its physical dimension, as a field. It's like you have different magnetic field on the Earth, which everything is reversed, but you don't see it, but it's part of the environment. We see these things, then we have to learn.

Then we can assess the length of life in the physical dimension. Or if we say, okay, the child will going live 5 years. We decide because we have a control, we understand the soul to let the child grow in the Soul level, which is unlimited. As we're all, we are ??

hearse with the understanding of the work of the Soul, then we live to the dimension existence of that soul, and you're here for thousands of years.

This is what I said, with this technology, is what is to come. It's what is set to come. It's what is planned by our physical dimension, and everything else. We see now, people live longer life. But we see, in the past, we went from 10, 20 years life to 30, 40, 50 years life, we doubled it. Now with 50 to 100, we are doubling this. But what is the quality of that life? (2:26). We lived 20 years, fully effective. We created, we made children, they grew up. How did humanity grew so fast, from a few creatures to start with? We live shorter life, effective life, we created a few. Then they did the same.

Does this long life of 100 years, 120 years, where we are productive from age of, let's say, 12, 15 to 35, 40? Then you have the rest of the life which is non productive, in the regeneration of the next cycle of life? Has it got a purpose? Or is it just to be in, just to be alive?

We have to decide, if you still stay 100 years, we are effective 100 years with no pain, we are active, there is no need for 65 years pension line, that you can't do anything, you've got to go home. These are, and then we see the cycle of what creates life. Why do .. people die more after the pension, first five years than they do in the next 15 years. Once you pass the five years, seven years, after you've been pensioned, you tend to live a good life another 20 years, 15 years in majority of cases. Because you took the pressures, you took the changes.

It takes 7 years for psychosomatic to take place. You're active, you stopped, you don't do anything, and then you run into problem. This is how that happens now in the Western world. That's how the insurance companies make money out of it.

But can we look at the Soul of the Man, the capacity, the space of the soul in the center of the brain says, okay, this brain, (2:28). this soul doesn't need to stay in the physical dimension on Earth with all the problems. Let it travel somewhere else, let it go somewhere else, and lives in that dimension, the way the stars do, for millions of years. We have that choice now, we understand it.

We've seen people, if you remember the lady in the last week of the test, she came out of the system, she said she could see her first light and then second light.

Now we become wise to that. And we had another gentleman with her, in another system, "I felt nothing." Because he came in to feel nothing, because he had to prove something to himself, not to us. We knew it before he goes in. Then it's something wrong with our system, because he came to prove to himself it's wrong, because that way he proved that he is in charge. We've seen it, very recent two or three cases like this.

So, how much do we control? What is the size of the Soul of the Man in the physical dimension? When you look at the MRI, is it one millimeter, is it three millimeter? Is it already out of 3 millimeter, grown by two and a half millimeter, and it's a fully mature

soul? Or is it half a millimeter, and it's got to grow into three millimeter, to gather more energies from the environment to be the soul of this planet. So, you live 200 years to get that filled up, or it was three millimeter gap you filled, you were born with two and a half, and you've got three years to live. Then we say the child accidentally died, or the person suddenly died somewhere just in sleep.

Did that maturity reached with that that breath, that it brought the right energy for separation? Putting aside accidental death, (2:30). we have to understand the new process. Putting aside the understanding of Totality, we need to understand the next step. These are part of the knowledge missing, we don't have it. This is part of the, it's like speed of Sun always been there, speed of light always (been there.) We never knew they had a speed. Till we had the tools, to be understood it. We've made tools for it, to observe it, and now we understand it.

Now, the new technology needs new tools, to understand it, to extend it. That's what I said, whatever man has learned about science today, is a speck of dust in the knowledge of the universe to come.

Here you have control over everything, you control the temperature, you control the pressure. You can't do that in the universe. What happens in the expansion of different fields strength of the universe? We have a lot to learn yet. As I said, we haven't even stepped up, to stand up, let alone to take the steps of a ladder, which is a thousand steps high.

No one in the universe has managed to understand all the process of the Creation, even those who claim. But as a Creator, as a Totality of the Creation, we have the whole knowledge. In the future, we'll see, I didn't know, now I know. (2:32). We see, we know knowledge's from other parts of the universe, which is not ours, but we have access to it. It's like an app, you can lock into and understand what's happening in that part of the universe.

There's a lot to come, we just opened a tiny little bit in the door of the knowledge, and you think it's hard to understand, it's unbelievable. When the door of the knowledge of the universe, or the Creation opens to us, you need to be part of the whole of the Creator to understand the Totality of it. We just look at the narrow pinholes of a pinhole, of a pinhole, of a pinhole, and sometime we think we are Totality.

This is what I always called, "I am the Messiah." Our Knowledge Seekers were taken by the security, "why does Mr. Keshe says he's a Messiah." And he explains, "he's a Messiah of his own Soul, nobody else's." Then, this is what you've got to understand. The national security's in one of the country's took people of the Keshe Foundation for interrogation. Why does Mr. Keshe claims to be a Messiah? (they said,) yes, he is. He claims to be, but he is a Messiah of his own soul, not the rest. He shares the knowledge he has.

I always say, I'm a Messiah, but Messiah means for myself, not for you. I can show you the path, the way I went, but it doesn't mean you're going to end up in the position as I have. Does it mean the position I'm in, is better than yours, or yours will be better than mine, or with another person? Or does it mean, we reached to the same point? Now you understand why we share the technology, open patent. (2:34). Because now you can estimate, you can assess where you're going to go.

This is what we have to understand. We need a new technology, we need a new understanding, we need to create new tools to measure the speed of M field. We need to produce tools to measure the strength of a soul. We need to create tools to see the interaction of the souls. We put two chemicals together and we see how they interact. What happens if you put the soul of this and that together? How would they interact? Nowadays, I think, in America and some other countries, you have to do. It's the same in Iran, you have to do a blood test before they give you a certificated for marriage, to see if you match.

Would you put the two souls, a strength, do they fit. In which part do they fit? What are we going to get out of it? These are the technologies, it's not anymore a dream, that we have to ?? believe.

Man will be so busy with development of new science, new technologies, that he will not even have time to think of war. The challenge of who knows more in scientific, will be more engaging for human race, than actually how to make weapons. Because knowledge becomes an asset of peace, and knowledge doesn't become an asset to be better than the other. This is what is to come, we have to understand. We have to develop technologies to understand.

First of all, now we know the position of the Sun of our life, which is our Soul, which has been in the center of our physicality. What does this Sun mean? What does the color mean? How they interact? How do they actually move? (2:36). All counts.

Then what the rest of us learn from it, what do we change to those who come to us from other parts of the universe? What do they bring us to add to test? "Oh, they've seen such and such a thing happening in this part of the universe." Can we do to understand it, do a research on how this happens? Now we take our knowledge to another country to research and develop, and find out what it is. In the coming time we get the passengers of universe bring us what they've seen, or we take them to another place, can you tell us how this works. Measurement of the Soul, the strength of the Soul, the interaction of the Soul, it will be one of the prime engagements of the human life in the coming time. It's not anymore what was said, something which was written 300 years after Christ, because somebody felt that's a good thing to put in. We're are there to test it.

Any other question?

Q: .. Will the elevation of the soul also result in a change in our DNA?

K- Most probably it will do, effect the RNA, everything is magnetic field, most probably.

R: So in that case, wouldn't that be an indicator, or a test in a way, for elevation of the Soul, (2:38). since mankind has now become possible to measure DNA only in the last decade or so, basically?

K- Yeah, but what is interesting, when you speak about DNA. Can we keep on testing the same DNA of the person, every 5 years and see if it stays the same? Or does it change? Our DNA changes, if by according to the food we eat, the environment .. we live in, it must have a ?? It's part of the evolution.

R: This become an argument with the medical profession, because they've been trained for so long to believe in DNA is not changeable, and your DNA is like a permanent structure that gets passed on. But it's not that way. Because changes that occur even in the womb, when the babies are growing and being born and grow up. There's lots of changes that occur. These are the same scientists that say that, was it 80% of the DNA is junk DNA. And only now they're starting to find out, oh, it's not really junk. It got a purpose, and so on.

K- Nothing is junk. It's a ladder for ?? It's like they say, you use only 10% of your brain, or 20% of your brain, or whatever. It's nonsense. Every single cell in the brain has a use, otherwise it won't be there. There is no non-usable position, even if it could be a ladder, or a structure to hold other positions. (2:40). Everything is not, it's not a microchip that every single bits is put in to do.

Part of the microchip you have, is a structure to hold it. So, when you have a DNA you have a part which is functional, part is a structural, part is for interaction of the functioning of the Totality.

Scientists tried to say, it's junk, what can it be. Without it cannot, you can't have a computer running if you don't have enough it in a frame, or stuck to something? They can't say, it's a computer without. If you don't have a wire, how do the chips communicate with each other? You understand?

So, which part of the DNA is a structure? We haven't understood this. Which part of the DNA is a field controller? Because we never understood, even the DNA is made of magnetic fields. Which part of it is the shielding for certain magnetic fields?

We just have come to something and because nobody knows, they can stick whatever they like into it, and they get the Nobel Prize for it. Like we've seen this week, all coming out for anything else. Or they get rejected, because those who could not think of what you thought new, it's something wrong with you. We've seen it with the Keshe Foundation.

So, when somebody tells you 80% of the brain is not used, excuse me, do you see empty head? If it's there, has a function. If it's been put there, according to the structure of the

field of the universe, every cell has a multiplicity of the application and usage. (2:42). This is what we don't understand. We never had this.

The cell in the brain of the man is like a switch ball. It depends how is orientated, how are the fields around it effected, then it has a different application. It performs different. We say now, that cell is there, or that area is there especially for that function. Yes, for that period of time. What happen when we change the environment? We see the same.

We saw this when what they said, the helmet came, was made by the Israelis in Belgium, where we did tests on the coma patient. You look at the dots on the lines. We looked at how these lines changed according to something else we added to it. Did it show no reaction, which means is dead, or it showed no reaction because it does not matter, it's not involved in that part of the work. We showed this graph sometimes ago.

So, these are the things we haven't understood, and we need to understand. Multi-functionality of the position and the strength of the same cell, creates different position, different reactions, different emotions in the body of the man. We never understood this.

It's now we understand how your nervous system works. If you go down the line, there's so much information going down. But if you touch the .. ?? measure, there is nothing on the skin in there, in a way. Compared to the amount of energy, which is going down into the legs, to the arms, to the fingers, to every cell of the body of the man.

But now we understand it, because we created Nano materials. When we measured it from outside, it's super resistor 20 Mega Ohm. (2:44). When we actually get into the layer, it's the best free run, free space, for high speed communication, because there is no friction.

This was not available to us up to now. Now we see in Nano layers, we can transmit it back into, understanding of it. Till the Keshe Foundation did not produce the Nano layers, with the way you do on your Cu wire, this was not understood. We were called a criminal, terrorist organization, because we discovered Nano layers without using radiation. So, you are all terrorists because, what I call, a guy in the company in Belgium decided this only can be done with gamma rays, and you all produce it now. I became a terrorist and a criminal, because I understood this first and I explained it, and you all use it.

Now we understand more, we have to develop. As, what we call, the new technologies are developed, the new materials will come up. You will be amazed what, in Keshe Foundation, in research, we are developing and changing every day. It's, knowledge of Creator has no limit, except when it comes to us limiting, according to our own intelligence. The beauty and the strength of it, the beauty and the mixture of it. The minute somebody tells you, "this is all and there is nothing else," it shows, ta-da! You're dealing with an ignorant guy.

Any other question? (2:46).

Q: Dean .. So, the technology Mr. Keshe, that's coming out, will it enhance the souls that I see on the screen (leaders)? Will it change their position? Will it bring about this peace that we also require?

K- Expand.

Q: So, those beautiful souls we see on the image in front of us, will they go cold or hot? Will they grow thinner or fatter? Will they experience the fields? Will they become enhanced? Will they elevate? Will they change their position? Will they understand the true divinity?

K- In different ways, we all do. But it depends. Enlightenment comes out of the time, position and the strength. We can look for enlightenment all our life and never get it. (2:48). We can walk at age of 2 in a room, and be enlightened. It's no limitation.

The people, the pictures we see, and I can add a few more to them, are they enlightened? Some of them know the truth but they cannot speak it, because they're already in a track (belong to an organization), they cannot go back. They're part of the system, which now (if) they're enlightened, will kick them out. Because they came through it, they were sponsored by it.

If you look, any of the people you talk about on the screen, which is President Putin, the Pope, the prime minister of Italy, and, what you call it, the King of England, have they reached the point (of enlightenment) sometime themselves, and they understood, but they cannot do anything, because then they get kicked out of?

Very few have the audacity of the, what you call, some of the leaders in this countries to walk away. With Putin, we saw Gorbachev. Gorbachev could have done worse, he walked away. With Pope we've seen, others who have been enlightened, but he don't do.

I was talking to one of our people yesterday in the center. You know who I'm talking about. I've said this before. We have a very beautiful Knowledge Seeker, (2:50). he's a Knowledge Seekers, a diplomat and politician, and a banker and everything else. He was originally the head of central bank of a country. Then, on the political structure, he was appointed to be ambassador of his nation. Because of his background as a economist and everything else, and the head of central bank, he became an advisor to the Vatican, having an office in the structure near to the office of the Pope. He was trusted because the countries, or the country and part he represented is where Vatican gets most of its, what we call, a lot of money from, and a lot of other things.

His position in Vatican became, because of his country and his whatever, whoever becomes ambassador of this country has that room, so it wasn't something especially given to him. We were sitting at dinner table in ?? a house, a few times this discussion came up, he said to me, you know Mehran, the problem, I've seen the world leaders coming and crawling like a dog to the feet of the Pope. He said, you cannot believe it. We see it, and we see it accidentally, that ?? we were allowed to see it. But we see the world leaders literally crawling, and they come into the room to the feet of the Pope and he has

to raise the money, ?? he have to feel he is more powerful than them. What else these people tell this, what does emotion creates in the man who is called the Pope, that the powerful world leaders crawl to them, bend to them. (2:52). What things they do to hold on to this power. What deals they do to get to this power.

We saw it with, as I said it, Hitler, when he used to give speeches, he used to ?? . We've seen it with, now the new cabinet of Italy. Berlusconi is back in again, why does it give a strength to a man at this age, to want to be a minister again, when he used to be a prime minister and has all the powers to do what he like.

Then we've seen the position of Charles, what .. can he do at the age of 72. He is a generation gap between what is happening, even though he wanted to be in, he is part of the gap. If you want to run a nation to be, you need to bring the young generation in the twenties, thirties, forties, not the seventies and eighties.

This is why in Keshe Foundation, we walk away at the age of 60 from Universal Council, because the new life has to come in. As I said, very soon I leave the Keshe Foundation to be run, because I'm there as a name, but it has to be done by the new generations, new things which has got to be done. But we've been witness to a lot of it.

Q: .. So, what question would you like humanity to ask you?

K- They ask me everything, every week as they like. There's nothing humanity... I'm one of you, but with more knowledge. (2:54).

Yesterday when we were doing a test, one of the Knowledge Seekers, because this is what is going on now in the center. I said, I'm not one of yours. It needs you to be in it with the soul you have. We are no different, but we are, we've seen more of the writing on the wall. Your knowledge, what you learned, what is written on the screen, is what you can read on the screen. We see a bigger screen of the Creation. So, that's why it sounds strange, because you're not, what you call it, grown in the strength to see what we see, to understand what it is.

Q: So, what does it feel like to know thoughts?

K- Humbleness.

If anybody had the knowledge I carry, if anybody had the power I carry, and detached from wealth, but uses the wealth to expand the knowledge for the others, you would have claimed everything on this planet with layers and layers not to be seen, hidden in the structures hundred times bigger than the Vatican and God knows what.

Being part of takes a lot, and changing through that position takes much more power. In June - July of 2004, when I walked away from Lockheed Martin with a massive offer on the table, I could have lived a king's life. (2:56). But none of it would have been shared. But today's it shared. How many of you saved your life with the Corona? How many of you have used the Gans's for different things, or pleasures, or pains, or whatever? How

much more of it is coming. Some of you saved money on the MaGravs? That's what should be. There is no question to ask, it's just we see a bigger canvas with more painting, and man has chosen to be color blind to the sizes, and some of the colors on the canvas. That's all.

Q: So do you see souls present, seeds present within humanity, that have the beauty to expand humanity, enhance humanity and take it forward?

K- Yes, yes. I was asked by a Knowledge Seeker yesterday, or the day before. "what do you see, when you look at something?" I said, you see one thing, I see two things. You look at the physicality. I see the physicality, and my soul feel the soul, and I react as a combination of the two. We don't ignore the dysfunction, we don't ignore it, but we look at it.

We see a lot of things. But what's the use of doing it? You've seen the people who come to the center. They come one way, and some of them would go back totally different and changed part of their life, ?? not all of it, because they get elevated. What happens the next day, next month, next year with interaction they ?? had. (2:58).

As I said before, if you build a system which can repeat the same thing in the number of people, now it's a technology, it can be repeated. That's all we do. You ask me, what's the next step? What is, what they can ask. You can ask any question. It has to be logical, scientific, and correct to answer. There is no room for theology anymore. Philosophy and theology was when we had no knowledge of the existence. Now we know part of it, we have to expand it, and then we find answer to all the questions.

Q: Mr. Keshe, many souls they experience though, they have this feeling, this understanding with inside themselves, everything that you speak about, and they understand it through their environment and what they've grown to become. So, trying to bridge the gap between the theology, what they've come to understand, and the science and the knowledge, is that plasmatic field, that .. enlightenment, whatever, yeah.

K- Yeah. Like you, were are there every day, where we do these trials, and this week there are no trials, but people come for different thing. Yesterday, I wish you were there, and you could video something, with something we tested. It was amazing what we saw in the man, in the change in the man. I said, I wished Dean was here, he could record this. (3:00).

We see physical changes, we see emotional changes, we see confirmation that I exist, becomes so powerful, that I actually exist, I matter. It is mind boggling in what is we see, what we come across.

Q: If each soul is unlimited Mr. Keshe, do they bring that unlimited beauty to the forward when they come to certain positions, and so it can change anything and everything in a moment?

K- For themselves, yes. Most probably, most probably, yes.

Q: Then that interaction with inside themselves then expands out across and effects many others?

K- Most probably, and how they interact, and what they take from it. This is an ongoing development in progress. It's not something that stops. We look at one angle of when they come in, we don't look at all the angles when they come in.

Any other question?

Q: Thank you, Mr. Keshe.

K- I wish you were there yesterday Dean. (3:02). It was an amazing situation.

Q: Yeah, I apologize ..

K- No, no, no it's not that, we have noticed that some things happened. It would have been amazing. We didn't do any, what you call it, flight test this week. So, as I told you maybe next Tuesday we'll have a few people coming in for it. But, what we see, observation is amazing. How people change with it.

Q: Can you expand on that Mr. Keshe? Can you give us more information?

K- No, because the work of the Keshe Foundation, where we set up these systems as like now, the test is ongoing with all of us, with the material in the flight zone. We test different capability of the system.

The flight test is part of transmutation, it's part of. We test other things, how materials do, like we did with Rick. We call in and get other people to do. Originally when we did the first enhancement structure system, the first, what you call it, units were very primitive in testing certain fields. When you bought those field testers, gave us a lot of information, and then the others. But this knowledge we already had. Now you get confirmation of more Knowledge Seekers understanding it, this is the important thing. Otherwise we can keep on building systems. (3:04). It says, okay, this is the system, we go to the next one and that's it, you just follow.

There are many, many things. When we opened the room on a Tuesday morning, when we closed the room on a Wednesday afternoon till next week. It's not just walking in into a room, it's feeling the effects of the fields. What has changed in the room? How do you feel when you go in the room? Because it's all fields.

When we get people coming with a disturbed thoughts, or trying to do something, we have a system which we can extract the energy from the room, and that system even tells us how much balance is the field in the room. Even our Knowledge Seekers who built the system are not aware of capabilities of it, they just built it. But when I'm in the room, when I test, it gives me a lot of information.

Who was in there to take, who was in there to give, how much is the balance. We have a couple two three or times, we asked them and I tested them. They can stop part of our

system, because both of them are literally flooding. We can bring another couple, put in, they can stop our system, but they literally take everything. Both ways the system stops. But with the materials with the control panels we have, connects us, which way is which.

We had Knowledge Seekers who go in the system, (and they say), "I came here to give to humanity." But my system says, (3:06). you're taking more than you're giving. Many times, sometimes you must hear it from outside when I do this test. The system, we can say if, the person says, "I've come here to give to world peace, I have come here to give to humanity." But my system, when you were in tells me, my god, you're taking a lot to give, most probably. You understand?

I mean, if the soul still needs maturity, it's still receiving more than giving, or it's taking in one level and giving in another, which doesn't register in our system.

They literally bring the system to a halt, absolutely halt, nothing happens. When we put them out, the whole system runs again. Bring them back in, I want to do it ?? again, I don't tell them what. I said, "do you mind if we go back in and we try a different test configuration." Put them on a system and we get the same result.

Then you've got to understand, one system is a giver and the receiver, and one system is a receiver only. So when he goes into the system, it can only receive, he cannot give. So, he cannot interact with, take, giving out. But he takes everything, that even the system cannot give enough.

Or we see the systems go from giving to taking, and taking to giving, you can see this in the operation of the systems. These units. It's not somebody came in and says, (3:08). these are half built system, because the guy came here to prove that it doesn't work, because he had a different agenda, we knew, before he comes in.

Q: So, would you have any advice for people going into the systems. I know you don't usually do this, but is there a balanced position? Is there a position that would help?

K- No. You know what I tell to Mario and the people upstairs? Don't tell anybody, don't give anybody pre-conceived ideas. Because if you give it to them, they come with that perception, and they want to enforce it.

Q: So, is there only a certain sort of soul that turns up to actually experience this?

K- Not really, all souls turn up. it takes different things, if they feel it. It'll be very interesting to monitor the environment of the, what you call it, Exhibition Center at night, or during the weekend, or during the time we are not there, and see how do the plants change? How do they react? How other things in the environment changes. It's very strange, when you look at the plants downstairs, you've seen walking around them sometimes, the plant division between the television side and the test side. If you look at some of the plants, have different combination, coordination of leaves and spacing. I come out and have a look when there are people inside, if they change their structure.

Q: I did notice Mr. Keshe, (3:10). one of the plants upstairs is suddenly sprouted quite a long stem towards the light above it, which is unusual, they don't usually see that within the structure.

K- Yeah, but they interact with the emotion and with the environment. ???. These are the things we observe. It's amazing when we see, you know, when somebody tells me, you know, I left my soul or whatever, I felt being somewhere else, you know, in your control room, those panels sitting there. They're just things flashing, but it means a lot. I see when the soul is not there, we see when the STP is not there. Because everything has a physical measurement, and we can measure, we can see the fields, we see the direction of the flow of the fields.

One of the systems is directional flow, we see if it is coming in or going out. When somebody says, "I give." If I pass the machine, just pick up a thing, which way the arrow tells me the fields are going. When it comes to the transmutation from one system to another, I see it in the monitors. The field flow is very strong, something is measuring it, high flow in one direction.

Q: The systems are built for the whole of humanity Mr. Keshe. It's to enhance and give the humanity the position and the availability to travel from point A to point B, transmute and do many other things. So, the systems will need to be adjusted for many different positions of field interactions from the physical, physical souls, and the souls, and the physicality present in the moments to follow or in this moment? (3:12).

K- We change it. It's like I said earlier, the physical transmutation is taken out of the system, which is running now. There is no way any of you can end up in the room physically, because we have a control over it. It's all switched off. There's no way anyone can turn up in Linz from Vienna there. Or if you get there, when we open the door we see tens of people running out.

Q: So, the immigration officer is going to be a limited resource to begin with then, Mr. Keshe.

K- Most probably, most probably. We will see. We are learning, it's a part of the process of learning for all of us.

Q: .. What can I donate when I enter the system as a human being? And who do I donate to? Does anyone need my knowledge, my experience? And how do I know that I am ready to enter the system?

K- The way we set up, the life is the system, if you understand it. (3:14). The way we set up, it's... We create a condition that we can control the environment ourselves. It doesn't matter here or when we become Man of the Universe, or we travel somewhere. We want to stop somewhere and see how it is. We create the condition in that environment that

allows us to stop and look, or feel. Does not need to be on a surface of a planet or in the liquid.

You travel between two cities, and somewhere in the middle you're stop in a bush on the road just to see how it is, how does it feel here, but it's not your destination. But, oh, I stay here for one more day, I put a tent up. In the space, how do you make that tent, that you can view, you can feel, you can enjoy that environment? Or do you go to a service station where the environment is created and you can enjoy that place, and what you're used to, and you can get something. It's now us how we set up our tent, where we set it, how we set it, and what environment we chose to set it.

This is the beauty of what becomes available to us, (3:16). we become the decision maker of the time, the position and the space. When you mature in the dimension of interaction of the fields and souls. I was explaining this recently to someone, when we see the souls. You interact with many souls.

You interact with, let's say, soul of one person or another, you're in a party, you see them physically, but you see the souls. It's like a flash of light. You know you get lights flashing everywhere, because it's instantaneous, one flash, one, and then it goes to the next one, and again back to the same one, one was the interaction? There is no language, it's a color, it's the strength of the fields, as I call it, of that color. If I hit on this, and this specific soul is blue now, 2 minutes later is green, because that soul interacted with other souls, the energy it got changed, so it changes. At the moment, it was looking at me as a normal person, now it's like, it looks at me, or feels with me as a friend, and now it changes, I don't want to be green. I want distance, you see the change in the color. It's a crazy world to live in this dimension. Absolutely crazy world when you see both, and nothing is hidden. But you choose to close the eyes.

Q: So Mr. Keshe, the souls that have chosen to set up camp here and they're maybe ?? . Will they eventually come to a realization, will experience the, you know, (3:18). the condition here and then decide to pack up camp and move on?

K- They do often. It's not the first time. They do often, you don't know them. The guy disappears, somebody was here and he's gone there. I said many times, look at some of the Internet, Internet cameras are amazing things coming up. With people having the ability to record this. In what time and expansion, and how it happens.

If you're not there to do, you're not there to do. I was 19, 20, I was involved in a very, very bad car accident. I saw going in, the accident, and I saw myself outside looking at the accident. The police officers and ambulance people they said, it's absolute impossibility, that you're alive with no scratch. They were convinced, they could not even, when they tracked, the road traffic on the road, because it was a snowy day, night, the ferocity of the accident.

I remember going in it, and I remember standing outside it. It's recorded with the police in Manchester. What happened in that span of time? Those days we had no airbag

systems. head on collision, and the car half the size of what is normally manufactured, (3:20). meters above the ground, and walking out of it. There was not even a way, if the door of the driver side was even opened, because when the police came he says, have you seen the driver? I said, I'm the driver. How did you get out? Not a scratch. The engine was in the driver's seat, more or less. Those, if there is documents, you can go and check in Manchester.

Did it happen? Was it caused? Was the Soul aware of the advancement of the physicality? And to what extent? Are we in the, what we call, position? And to what extent?

I've been through three accidents like this my lifetime. Was it a destiny, not to complete? (3:22). And, is it part of the life, which is not supposed to end, because you've got to do something else? Or are we from another dimension, that we foresee and we come out? But what do you see in cameras, people just walking out of something which can't be. I've been there, three times.

Then the rescue services, when the ambulance, and the police turned up, the track of the road was clear, I was the only driver, the only car, and one which has gone the other way. No other tracks. Around about 60, 70, 100 kilometers an hour. Hitting a wall, and just going up and landing on top of it. I was on the ground. Is it our soul that takes us out? Or are we perceived to that position? Or do we choose to be part of that position?

I was tested for drugs, I don't touch, I never touched in my life. I was tested for alcohol, I was tested for everything else. I was taken by an ambulance to the hospital to check if there is any damages, anything, whiplash nothing. (3:24). Is the Soul aware of physicality, takes it out? We have to understand. We choose to be here, there's a reason for it, or physicality has got nothing to do with it?

It's the same situation as I discuss with you, and it's on the table. Why the Foundation is going through the steps which is going today, for the past few months? Because we chose to expand the Foundation, in a very rapid way. But a lot of things are not ready around it, and it's not kicking into its final phase. Everything has been done. We came to you as Knowledge Seekers to help us collectively to do it.

We get accused of stealing, lying and everything else. But it's not happening, because it's done. It's done in a totally legal way. But it keeps on holding back, and I said to myself, there was a reason for it. But when I look at the expansion of technology in past few months, would we be where we are today, if this would have happened six months ago, eight months ago, when it was supposed to happen? Most probably, it would have taken us to another direction, expanding things what we Keshe Foundation was supposed to. Because the knowledge has to be shared with ?? a lot. But the knowledge didn't need to be expanded into commercializing ??, it had to come to where it is now, that now we can expand.

People who are supporting us, cannot ?? tomorrow, next week, it'll be done, it'll be done today. (3:26). And we keep on. All of you. How many of you helped us in the Foundation? Then they threaten us, that we go out, we embarrass you, you're a crook. It's in black and white. Is it shows where it's been paid, it's done it, it has done. And it's there for .

Because when it comes it'll change the life of all of us. Was my Soul aware of this change? Or we brought through other souls to be where we are to unify humanity to come? I don't think we would have been in a different ?? way. We had no choice, it's what is coming to. I wanted the Foundation to expand internationally, that it becomes bigger with everything else. But the souls are not ready for it. We came through the direction of developing the other part of it, which is getting developed in the background.

And how many Knowledge Seekers accuse me of stealing, and you're a liar, and you're thieving, and you promised. Nothing has changed. Because we entered a legal binding contract. And I'm watching them, I'm that guy out of the accident, watching what is going to go. And how many threats we received. You are a liar, we're going to expose you, you stole from us. It's there.

When it comes, I was part of the Keshe Foundation, I was the guy who helped. We haven't stolen from anybody. We didn't go and crash the car deliberately. How many of you supported this change? How you want to make accusation when everybody is in it, and it's all done. There is a reason for it, today to tomorrow, the next week, because I see every delay we have next week, has brought better position what the Foundation is .

The souls who are protecting it wanting it to be there. (3:28). You're going to accuse the Foundation of everything you like, but Foundation is not ready. Humanity is not ready for that, what we set up to achieve. Maybe it'll be tomorrow, maybe today, maybe next year. But I'm the guy out of the accident watching, and I just tell you what's going to happen. It's not promises, it's is not something trying to fool someone or cover something.

We are witness to a massive change. You will see ??. Then, how many of you will be part of it. This is what I did, this is what I do, I was there because of me? It's because of none of you, because we all got involved in it. It's not the Keshe Foundation, it's the supporters of Keshe Foundation, which you brought with your donations, with your loans, bringing that condition of change. It's not going to be, "oh, he took our money and he ran, the Foundation has to give." If Foundation had, he's put all it's assets to it, it's for you lot.

It's not for me. I live, I can live a king's life. All I need to do is just change the color of my passport. Threatening us, and we are going public. Go and do, because it's been in public. You were there only when it was good for you, when it was . Now some of you feel what I've done for 15 years, 20 years. Everything has gone into to change the humanity.

Are we aware of it? Is my soul aware of it? Most probably, yes. Go public with everything. It shows how solid we are, how we stand by ourselves. No government pays

us, no organization can interfere with the teaching. (3:30). Nobody can stop the way we develop things.

I foresaw a change, which is time for it to come, 12 months ago. I got involved in it, put everything of the Foundation in it, and I went to individuals and groups, and I came to you lot. This needs to be done, because we have to bring, it's us. How come you're here for the MaGrav system. How come you're here to get a better health system. How come you're not there when it comes to get involved in it. So, which way it goes?

If I put everything in, and you're in it, why you make threats? We have one Knowledge Seeker who comes in, I'm going to expose. Expose what? Your crookedness? You came here just to take. How come everything has to be from Mr. Keshe, and Keshe Foundation, and all of you just benefit by it.

I'm an outsider, I watched the accident and I see how people have behaved, not a manmade accident, but clarity of the time and Soul. I don't lose credibility, it's not my credibility. It's your understanding of your own credibility. I put everything in for 20 years in public, and 20 years before in private research. If I wanted to cash it in, I would have cashed it in hundreds of days ago, and months and years ago. But the Soul has chosen to bring humanity to that point, and I have to go with it, with the physicality.

Any other question? (3:32).

Q: .. I was unable to attend the teaching last week, .. when you started training people to be Satellites?

K- Pardon? When we started training people to be Satellites?

Q: Have you already started training people to be Satellites in the teachings?

K- We have already. Those who are Satellites already are involved in the whole structure in the dimension we know. It's not that we call you, you're going to be a Satellite. We don't send a message, ?? Satellite be ready, you're going to start working today not tomorrow. Part of the system which is run today, if you are a Satellite, or if you volunteered to be, or you are already receiving it. But you have to understand, it's not somebody who knocks on your door, it's not a delivery post. It's the elevation of the soul, elevation of the understanding.

Q: I wish to be a Satellite.

K- Go and register. Yes, go on the Keshe Foundation website and do. Because we will contact those. It's a Satellite, it's there, especially it's there. Go to the section, what you call it, Rick's show, it's there. Every day, every week we get people signing in, to become Satellite.

Q: I've already signed in, in the very first day. (3:34).

K- So, you're sitting there, you're sitting there. You've got to realize this volunteer work.

Q: I can't receive any emails. Last week I had to leave my house, I had to sell my car, so I can buy food, and it's very low income. My phone was stolen that day, I can't access my emails because of double verification, etc. Very ??

K- I'll get Keshe Foundation people to check out in the background where it is, and how they can help you. Rick, if he can put his thing to our private chat, and I get our Internet guy, IT people to look at it. But we don't usually, at the moment, answer to these things, because there's so much of it. Then, what I know we are doing, they're separating the Mobile people from the satellites. We have a very few. We thought we finished with the people who go for flight test and transmutation. But I just found out yesterday there is another seven, eight people left, which are coming next week, which was supposed to finish.

Then we go into the Satellite system. You've got to understand, the full Satellite part of the work comes when the two new systems come into the Center. This is where it's facilitated, for the position, location, fields, strength, and whatever. At the moment we have two separate (systems). Even it looks the same in the frame, I sometimes pointed out to the people who come in. (3:36). You see this, this system is set this way, and they see it physical, it's physical changes, you see.

Now it's a new system, when we can bring both location, and the fields, and the environment, and the soul together. The Satellite people in a true interaction, you've got a couple of months. The same as with the, what we call, mutation or transmutation and the Mobile system. We will not go into that phase till the two units are actually in the center, we check with couple of people.

You've got to realize, like as I said, the way we do now, you've seen in the Enhancement Unit, the prelude to these EU was tested with a few Knowledge Seekers. Two or Three Knowledge Seekers, without anybody knows. One or two of them even traveled into Linz to be part of the first trials. We tested in different ways for different things, how it works, we build systems for them to see if it interacts. But we look at the physical interaction and the other dimensions, and how it comes. This is the process.

You just got to wait. You get a confirmation one way or another. But the Satellite people, when a time comes, we get in touch with you directly, you'll receive an email when we are ready. You'll be switched on.

Q: .. I wish for you to use me as a Satellite. I don't have access to my emails, my phone was stolen. I have no money. ..

K- It doesn't matter. (3:38).

Q: Just please, just use me.

K- We get a lot of people doing that. It goes to the Foundation. It goes to the IT people who sit. We have to get in touch with the people, with the Satellite. There's a lot of things behind it.

There is huge amount of work behind it. We have to go through these steps, step by step. It's a development step, it's testing ?? steps, there is the other parts to it. Some of you who been through the flight system might receive an invitation to come back. Because we want to test the new flight system, you've been there. We're not going to come back, we want to test the flight system, can you register again?

It's like today. The Knowledge Seeker knows who he is, or who she is, knows that we have started the first phase of Mobile transmutation. But to get to today, it's taken us two months. And we are testing in a specific way for ?? oneness. The same person has been part of the original tests. We call upon the people who we know, we trust, we worked with before, we get the exact information we want. We don't go pick people up the street, can you, do want to become a pilot test. We don't advertise on televisions, or radios or Internet.

There are a lot of Knowledge Seekers who do a lot of work for the Foundation, or with the Foundation. (3:40). They bring a lot. They do a lot. They open a lot of things for us.

We have a lot of silent Knowledge Seekers who do a lot of work in the background, because it's for them, it's for the evolution of humanity.

Any other questions?

Q: Wang Lynn .. When we are in the physical soul level of sense, then we can really feel the pain in the past that we have made, have marked our body.

K- What you mean?

Q: ... Like, I was in meditation, and suddenly I feel so much pain from my legs. Right now, I know that means a lot of information inside, that when the fields was trying to open in my body, (3:42). if I'm in a correct, like a frequency, or how to say, ?? I can read those information, what that pain means for me, what happened there.

Because actually, when I was awakening, I don't have that pain there, but when I was in that kind of fields, I feel that pain, so that must be something that happened before, and then I can try to find the information from there. So, what I mean is that, I was in that field, the field level is reached to my like, subconscious level or like basic soul level, so that I can now, my body can sense that feeling.

K- I don't know. It could be your present condition created that. It depends what you want to connect it with.

Q: Yeah, but we have tried some exercise and even like we feel the pain, and then we get the information from that. Even I can connect to a lot of people and feel his pain, and tell what that pain comes from, and why ?? some information we get from that?

K- I presume it's another level of understanding. It's how you interpret and how you understand that pain. Which is maybe another dimension, which you are familiar with,

you have the understanding, or training for, that this pain is connected. If was a doctor he says, "oh, sorry, you got thrombosis." (3:44). But you don't look at the thrombosis. SO you say, "oh, this has to do with a past, you are running away, something 100 years ago and now you feel it, and it's your past coming in. Depends if you are interpreting it, or does a doctor interpret it. You understand? It doesn't mean that you're wrong.

In this world of knowledge of universe nobody's wrong. Because we take it according to our understanding.

Any other question?

Q: .. In the public teaching of last week Mr. Keshe said that the Keshe Foundation will be globally banned after the coming Christmas. My question is that...

K- I said, they were trying, they were trying to globally banned, Not that it's going be . They're trying.

Q: My question is that, should I worry about this? Because after years of studying I still not have finished all the teachings, I don't have all the backups of these teaching videos.

K- We have a full backing of everything in three, four layers. We backed up everything, We've got the backing of every sessions everywhere. Don't worry. If anything happens, we have consolidated every single, all the teachings, all the chats, everything has been kept. The IT team in the background is storing everything. (3:46).

R: It would be good idea for people to do their personal backup as well. You know, a couple of terabyte hard drive you could probably backup virtually all the 2,000 videos of the YouTube videos, for example.

K- Yeah. There is a lot of things that is backed up, a lot of zoom chats, which has been kept. There's a structure in the background the IT people keep. We are paying for nearly 13 servers operation.

Any other question?

Q: .. We are just those children at the stage of curiosity who ask about everything, and the father is always there to answer and educate. Thank you for being so loving in educating the children of the earth. About pressure of fields, the soul of the physicality in the strength of the blood fields press the fields of the STM and this creates the universal dynamic system. In the multi-core reactors this process was taught by you in the 134, 138 and 144 KSW where the force of the intermediate layers, (3:48). containing the Hydrogen - the feeder, rapidly feeds the common component in the center, creating the compression of the fields and the dynamic system of universal motion.

Our question is, in the capacitors a pressure of fields is also established. Would this system of the Hydrogen - the feeder also be present in the layers between the aluminum barrier, the transition of the Gans, and the center rod, as the amplifying core of the fields that pressurizes the fields generating dynamic system that feeds the plasma flow?

K- I'm lost.

R: It's a long one. Let me try to summarize here.

K- He is talking about different plasmas, different layers pressurizing each other, more or less. But they always do, they always do. If it's there to do, why do you need to pressurize? Sometimes you need to pressurize. But why do you need? You get more out of the plasmas if you leave it free, than actually pressurizing it.

But we do it in the dynamic system because there was something to learn from it. As I said, the new plasma systems, we have the new reactor systems, which is used for us, we don't have any dynamic system in the structure of the control. We use dynamic system for a specific, one, for a specific reason in the systems.

Any other question? It's nearly one o'clock. (3:50).

Q: Dean ... So I don't know if this would be an easy one to answer. There is a thought and there is some people that have said, that if you speak about certain conditions, as in the wrong things, and all the conditions on the planet that happen, that you're amplifying and making the field strength greater, you're adding to it.

K- Can you repeat that?

Q: So there's a thought that if you speak about certain conditions, certain things that happen on the planet, environment, in families, whatever. You amplify it, if it's a wrong intention, and if you speak about it and you give it thoughts and intentions, does this amplify it? Or can you speak about it as long as your intention is to try to help?

K- I don't know, it has different school of thoughts with this one, huh. Some people see it if it's a. I do that, don't talk about that, because you know you bring it in, because it's like you put the soul of the emotion to be where you want it. You're not the only one, I always. Because I see. I'm aware of other dimensions of the interaction.

But, does it amplify it? Or actually brings it out to be sorted out? Or to be elevated for it? Or with coming in, you don't give it the importance and it goes lower? Depends from the point of the observer this.

Because I have had talked some discussions about this for a long, long time. Does it . I always say, we have a very good English word for this, (3:52). leave the dead to be as they are. Because ?? we have a say...

R: More or less, sleeping dogs lie.

K- That's another one, yeah. You don't want to get them barking, or you never know, it could be a beautiful dog coming to you and cuddle. It is what it is. It is what it is. We cannot change it. It is what it is.

R: A time and place for everything. There's a space...

K- Do you wake a dog up in the middle of a sleep? Or do you wake a dog up, and it's hungry and you feed it? It's what I said, it's the same. It's what we get out of it.

Q: Afar ... If you don't mind, I was going to tell Lin about her pain like when she meditates. Can I tell her something?

K- Yep.

R: This is not medical advice?

K- It's not a medical. Oh, she's a doctor, she can do.

Q: When you meditate, especially when you sit cross legged with the touching the ?? ear to the ?? lower position. Because you feel the pain, it's not because the pain wants to tell you something. The pain, the only thing it is telling you is, you're still in physicality, because after 5, 10 minutes, you want to ?? lose ?? . (3:54). In time, when you pass the physicality, because your senses, your five senses is very active. After a while, you're not going to feel your body, you can sit for hours, like six, seven hours without even feeling anything, but you passed the physical level, you go to the soul level.

So, it's the same thing if I cut your arm, I can place a suture. If you're in physicality, you feel the pain, you feel the suturing, but if you pass the physicality I can do the operation and without you feeling anything, because you pass that level, you go to the level of the Soul. So it's not teaching anything, just you have to pass that after a certain time.

K- As I said, depends how you interpret it. The ways it gets interpreted. It's by interpretation.

Q: Lynn. .. Yeah, but what I mean is like the emotional level, because sometimes ?? is like the lady, ?? she was in very pain. But when we found why she had the pain, and the information gave to her, she feel the pain is gone. So, I was the, my question is like, some pain, it's like, not usually you have the pain, maybe is some part of your body suddenly.

But it's like a memory. Like, it's not, how to say, ?? but I think it's more like the feeling in the emotional level, emotional feeling pain, but not the body has the uncomfortable, or has some pressure. It's not like that.

Q: Azar, It's very probably. It's possible, it's possible. It confirm the memory of something in the past that you're feeling, (3:56). that is correct. Your senses are correct.

K- Okay, thanks very much. Thank you for everything. And hopefully we'll see you next week. Maybe we share more knowledge next week. Thank you, indeed.

455 KSW October 20, 2022

END
